USER MANUAL

Thank you for purchasing this innovative LOGIC device. The specifications in this document are subject to change without prior notice.

LOGIC and the LOGIC logo are registered trademarks of Swagtek, Inc. Other trademarks are the property of their respective owners.

Charge for 24 hours before using.

Install SIM card / memory card.

Connect your Logic phone to the computer using a USB cable (not included).

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not properly installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

SAR Information Statement

Your wireless phone is made to transmit and receive. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission (FCC). The FCC has determined that the SAR of all wireless phones must be tested and labeled. The SAR of all wireless phones used by the public is 1.6 Watts/kg. Tests for SAR are conducted with the phone transmitting at its highest certified power level. The SAR level of the phone while operating can be found on the rear cover of the phone. This is because the phone is designed to operate at multiple power levels in order to use the least amount of power to reach the network. If you use the phone in a weak signal area, the phone will use a higher power level to maintain the connection. The FCC has determined that the SAR of all wireless phones must be tested and labeled. The SAR of all wireless phones used by the public is 1.6 Watts/kg. Tests for SAR are conducted with the phone transmitting at its highest certified power level. The SAR level of the phone while operating can be found on the rear cover of the phone. This is because the phone is designed to operate at multiple power levels in order to use the least amount of power to reach the network. If you use the phone in a weak signal area, the phone will use a higher power level to maintain the connection.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with FCC exposure requirements, a minimum separation distance of 15 mm must be maintained between the back of the phone and the body. The phone should not be held against the body or worn in a pocket. The phone should not be used while driving. The phone should not be used while operating heavy machinery. The phone should not be used while operating a vehicle. The phone should not be used while operating a machine. The phone should not be used while operating a power tool. The phone should not be used while operating a saw. The phone should not be used while operating a drill. The phone should not be used while operating a hammer. The phone should not be used while operating a nail gun. The phone should not be used while operating a stapler. The phone should not be used while operating a hole punch. The phone should not be used while operating a paper shredder. The phone should not be used while operating a fax machine. The phone should not be used while operating a scanner. The phone should not be used while operating a copier. The phone should not be used while operating a printer. The phone should not be used while operating a plotter. The phone should not be used while operating a server. The phone should not be used while operating a network switch. The phone should not be used while operating a router. The phone should not be used while operating a firewall. The phone should not be used while operating a proxy server. The phone should not be used while operating a load balancer. The phone should not be used while operating a content delivery network. The phone should not be used while operating a cloud storage service. The phone should not be used while operating a social media platform. The phone should not be used while operating a messaging app. The phone should not be used while operating a video streaming service. The phone should not be used while operating a music streaming service. The phone should not be used while operating a gaming app. The phone should not be used while operating a productivity app. The phone should not be used while operating a business app. The phone should not be used while operating a financial app. The phone should not be used while operating a healthcare app. The phone should not be used while operating an education app. The phone should not be used while operating a travel app. The phone should not be used while operating a food and beverage app. The phone should not be used while operating a fitness app. The phone should not be used while operating a weather app. The phone should not be used while operating a news app. The phone should not be used while operating a sports app. The phone should not be used while operating an entertainment app. The phone should not be used while operating a utility app. The phone should not be used while operating a home automation app. The phone should not be used while operating a security app. The phone should not be used while operating a pet care app. The phone should not be used while operating a gardening app. The phone should not be used while operating a home improvement app. The phone should not be used while operating a car maintenance app. The phone should not be used while operating a car insurance app. The phone should not be used while operating a car rental app. The phone should not be used while operating a car wash app. The phone should not be used while operating a car detailing app. The phone should not be used while operating a car repair app. The phone should not be used while operating a car parts app. The phone should not be used while operating a car accessories app. The phone should not be used while operating a car insurance app. The phone should not be used while operating a car rental app. The phone should not be used while operating a car wash app. The phone should not be used while operating a car detailing app. The phone should not be used while operating a car repair app. The phone should not be used while operating a car parts app. The phone should not be used while operating a car accessories app.
