

Akoo.com Kima operating instructions:

The Kima system allows you to listen to music over the Internet on your home stereo system or FM radio. The Remote unit allows you to either directly connect to your stereo with RCA type cables or to retransmit the music over the FM band at 88.1 or 88.3 MHz.

Use Instructions:

- 1) Connect the Audio out of your PC sound card, CD player or similar device to the Audio Input of the Kima Base unit.
- 2) Place the Kima Remote unit up to 1000 feet away, within 10 feet of your FM radio to use the FM transmitter function or connect the Stereo out connection of the Remote unit to the Audio In of your stereo receiver.
- 3) If you wish to use the FM transmitter feature, tune your radio to the same station as the Kima Remote unit is set to, either 88.1MHz or 88.3MHz.

Battery Power:

The Kima Base and Remote units can be powered either from a 6 Volt AC Adapter or from 4 AAA type batteries.

NOTE:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

In order to maintain compliance with FCC regulations shielded cables must be used with this equipment. Operation with non-approved equipment or unshielded cables is likely to result in interference to radio & television reception.

CAUTION:

Changes or modifications not expressly approved by Akoo.com may void the users authority to operate this equipment.

The following is provided for users of the Kima remote without FM Band transmitter option:

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
