Dear Bill,

This Letter is to confirm in writing that Dynastream would like to respectfully request that certain aspects of the Intellectual Property for the FCC SDM Triax 100 foot sensor be kept confidential. The reason for this is to keep trade secrets confidential, and protect Intellectual Property that has not yet been patented, as this is a new product with many potential competitors.

The items I would like to be kept confidential are the following two items in the filing.

Item #	Exhibit type	Description of exhibit
1	Schematic	Schematic Parts List
2	Operational Description	Operation

Thank you for your attention to this matter.

Sincerely,

Ko Fyfe 2K1113
