Test Firm Name: Shenzhen Anbotek Compliance Laboratory Limited
Date of Original Email: 2/24/2014
Registration Number: 752021
Correspondence Reference Number: 167421

Subject: FCC Information request follow up

The FCC has reviewed the information provided on January 21, 2014 in response to the information requested by the FCC on January 17, 2014 and December 16, 2013. The response submitted raises some additional issues.

Please address the following:

1. The FCC requested that test reports be submitted for all devices tested to the procedure that Shenzhen Anbotek identifies as "FCC Verification of Conformity" but the test report that initiated the request was not submitted. Please submit the full report for File number AT1306679F Report Number 201306739F dated June 13-18, 2013 and verify that the total number of products tested to "FCC Verification of Conformity" was only four.
2. The procedures submitted identify one of the FCC test procedures and FCC Declaration of Conformity (DoC) but nothing in the procedure indicates that Shenzhen Anbotek is not recognized by the FCC to test these types of devices. Please modify procedures to indicate that Devices subject to FCC DoC will not be tested by Shenzhen Anbotek.
3. Of the three test reports submitted which were tested to "FCC Verification of Conformity", the two that show labels, show labels for FCC DoC and not Verification. Please explain why and how they will be corrected. Also, provide procedures that will be put in place to prevent this in the future.
4. The test reports provided identify the authorization type as being FCC VOC in one place and Verification in another. Please modify to remove all references to FCC VOC as it isn't a valid FCC procedure and is confused with FCC DoC.
5. In the FCC Part 15 Table provided the first authorization type should be corrected to Verification from FCC VOC. Also, the test firm and approving authority for Verified devices is not limited to 2.948 listed test laboratories.
6. In the FCC Part 15 Table provided the third authorization type is identified as FCCID but the correct term is Certification. Devices subject to Certification may be tested at a 2.948 listed test firm or an FCC recognized Accredited test firm. These devices may be authorized by the FCC or a Telecommunication Certification Body recognized by the FCC. Please submit a corrected version of the table.

Do NOT reply to this email using the reply button. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
