Class II Permissive Change (C2PC) Request Letter

We,

Company: Monitor Audio Ltd
Address: 24 Brook Road
City: Rayleigh, Essex, SS6 7XJ
Country: United Kingdom

In line with FCC rule part 2.1043 and KDB 178919 D01 would like to request a Class II permissive Change for our existing Grant of certification under FCC ID: O7V-MA104210 with the changes detailed below:

The change is to add a 3rd Model/variant to the existing certification. This 3rd model variant is called the Streaming Pre-Amplifier. It contains exactly the same radios and antennas as originally certified for the Streaming Amplifier model, however the left and Right audio amplifier pcb's and associated PSU has been removed along with the speaker output connectors, and the PSU transformer has been replaced with a smaller version. Please see the "3rd model variant document supplied with the certification request for further details.

Along with the necessary forms/letters/declarations required - the following is a list of exhibits that have changed/require updating and will also be uploaded for the Class II PC application:

FCC ID Labelling Artwork remains the same, and label location stays the same, however a new label location document is provided as the back plane artwork shows the Left/right connectors removed.

Updated user manual.

Updated schematics (non-radio).

External photos.

Internal photos.

Test report.

Test set-up photos.

Technical theory/operation.

Yours faithfully,
