Re: O8FHVP-1H VisorPhone Certification
Equipment classification

While trying to submit a permissive change (EA100462) to this grant (O8FHVP-1H) I was made aware of the fact that the original equipment classification was “ Part 24 Equipment held to face”. A more appropriate classification for this equipment would be “Part 24 Equipment worn on Body”, even though it can also be held to ear.

Given this, could you please change the equipment classification to Part 24, Body Worn.

If there are any question / concerns, please do not hesitate to contact me.

Sincerely,
