M2A[®] Patency Scanner PS1

FCC ID: O8PPATENCYSCANNER

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

LBL-0069-01

Test the color and glue of the label as follows:

Stick the label on a flat surface and perform the following:

1. Rub without pressure for 15 seconds using a water soaked cloth.
2. Rub without pressure for 15 seconds using a ISO-PROPANOL soaked cloth.
3. Rub without pressure for 15 seconds using a METHANOL soaked cloth.

After these tests, the text must be clear and legible. The label's edges must neither curl up nor detach.
