Hi Mike,

Here are the replies.

[Question #4 : Please provide probe calibration file](#)

Reply: The probe calibration file is attached.

[Question #5: Please provide dipole calibration file.](#)

Reply: The dipole calibration file is attached.

[Question #6: Page 11 of SAR test report, SAR reference for 2450MHz is body but during system validation tests, head liquid was used but referenced to body SAR reference value. Please explain and make necessary correction.](#)

Reply: This is a typo and correction is made as attached.

Hi Mike,

Here is the reply.

Question #1: The information contains in the operational description is the software installation procedures which do not consider as confidential information. Please remove this item from request for confidentiality letter.

Reply #1: The item is removed as attached.

Question #2: In the user manual, it provides the installation instruction to install the CF card by removing the screw. Please confirm the following :

1. Will the end user be allowed to install the 802.11b CF Card ?

Reply: No, the end user is not allowed to install the 802.11b CF card.

2. Will CF card be installed by the application only ?

Reply: It is for memory card only.

Question #3: Page 32 of SAR test report, the zoom scan is outside the hot spot based upon the plots. Please position the zoom scan on the hot spot and provide the reading.

Reply #3 The zoom scan is re-positioned. Please refer to the attached.

Best Rgds,

WK
