1 - GENERAL INFORMATION

1.1 Product Description for Equipment Under Test (EUT)

The Global Assistive Devices, Inc., model 09QDBT300 or the "EUT" as referred to in this report is a door beacon which measures 3 1/8" L x 2 1/4 " W x 3 1/4 " H.

1.2 Objective

This certification report is prepared on behalf of Global Assistive Devices, Inc. in accordance with Part 2, Subpart J, and Part 15, Subparts A, B, and C of the Federal Communication Commissions rules.

The objective of the manufacturer is to demonstrate compliance with FCC rules, Part 15, Sec 205, 209, and 231 for conducted and radiated margin.

1.3 Related Submittal(s)/Grant(s)

No Related Submittals

1.4 Test Methodology

All measurements contained in this report were conducted with ANSI C63.4 –1992, American National Standard for Methods of Measurement of Radio-Noise Emissions from Low-Voltage Electrical and Electronic Equipment in the range of 9 kHz to 40 GHz. All radiated and conducted emissions measurement was performed at Bay Area Compliance Laboratory, Corp. The radiated testing was performed at an antenna-to-EUT distance of 3 meters.

1.5 Test Facility

The Open Area Test site used by Bay Area Compliance Laboratory Corporation to collect radiated and conducted emission measurement data is located in the back parking lot of the building at 230 Commercial Street, Suite 2, Sunnyvale, California, USA.

Test sites at Bay Area Compliance Laboratory Corporation has been fully described in reports submitted to the Federal Communication Commission (FCC) and Voluntary Control Council for Interference (VCCI). The details of these reports has been found to be in compliance with the requirements of Section 2.948 of the FCC Rules on February 11 and December 10, 1997 and Article 8 of the VCCI regulations on December 25, 1997. The facility also complies with the radiated and AC line conducted test site criteria set forth in ANSI C63.4-1992.

The Federal Communications Commission and Voluntary Control Council for Interference has the reports on file and is listed under FCC file 31040/SIT 1300F2 and VCCI Registration No.: C-674 and R-657. The test sites has been approved by the FCC and VCCI for public use and is listed in the FCC Public Access Link (PAL) database.

Additionally, Bay Area Compliance Laboratory Corporation is a National Institute of Standards and Technology (NIST) accredited laboratory, under the National Voluntary Laboratory Accredited Program (NVLAP). The scope of the accreditation covers the FCC Method - 47 CFR Part 15 - Digital Devices, IEC/CISPR 22: 1993, and AS/NZS 3548: Electromagnetic Interference - Limits and Methods of Measurement of Information Technology Equipment test methods under NVLAP Lab Code 200167-0.

1.8 Power Supply and Line Filters

Manufacturer	Description	Model	Serial Number	FCC ID
SANYO	Battery	9V	N/A	N/A

2 - SYSTEM TEST CONFIGURATION

2.1 Justification

The EUT was configured for testing in a typical fashion (as normally used in a typical application).

The final qualification test was performed with the EUT operating at normal mode.

2.2 Block Diagram

Appendix A contains a copy of the EUT's block diagram as reference.

2.3 Test Setup Block Diagram

2.4 Equipment Modifications

No modifications were necessary for the EUT to comply.

3 - CONDUCTED EMISSIONS TEST DATA

Not applicable because of battery operation.

4 - RADIATED EMISSION DATA

4.1 EUT Setup

The radiated emission tests were performed in the open area 3-meter test site, using the setup accordance with the ANSI C63.4 - 1992. The specification used was the FCC Class B limits.

The spacing between the peripherals was 10 cm.

External I/O cables are draped over edge of test table or bundled when necessary.

4.2 Spectrum Analyzer Setup

According to FCC Rules, 47 CFR 15.33, since the internal processor speed operates between 108 MHz and 500 MHz, the EUT was tested to 2000 MHz.

During the radiated emission test, the spectrum analyzer was set with the following configurations:

Start Frequency	30 MHz
Stop Frequency	2000 MHz
Sweep Speed.....	Auto
IF Bandwidth.....	100 kHz
Video Bandwidth.....	1 MHz
Quasi-Peak Adapter Bandwidth.....	120 kHz
Quasi-Peak Adapter Mode	Normal
Resolution Bandwidth.....	1MHz

4.3 Test Procedure

Maximizing procedure was performed on the six (6) highest emissions to ensure EUT is compliant with all installation combination.

All data was recorded in the peak detection mode. Quasi-peak readings performed only when an emission was found to be marginal (less than -4 dBμV), and are distinguished with a "QP" in the data table.

The EUT was operating at normal to represent worst case results during final qualification test. Therefore, this configuration was used for final test data recorded in the table(s) listed under section 4.7 of this report.

4.4 Corrected Amplitude & Margin Calculation

The Corrected Amplitude is calculated by adding the Antenna Factor and Cable Factor, and subtracting the Amplifier Gain from the Amplitude reading. The basic equation is as follows:

$$\text{Corr. Ampl.} = \text{Indicated Reading} + \text{Antenna Factor} + \text{Cable Factor} - \text{Amplifier Gain}$$

The "**Margin**" column of the following data tables indicates the degree of compliance with the applicable limit. For example, a margin of -7dBμV means the emission is 7dBμV below the maximum limit for Class B. The equation for margin calculation is as follows:

$$\text{Margin} = \text{Corr. Ampl.} - \text{FCC Limit}$$

4.5 Summary of Test Results

According to the final data in section 4.6, the EUT complied with the FCC 15.231 (b) standards and these test results are deemed satisfactory evidence of compliance with RSS210 of the Canadian Interference-Causing Equipment Regulations, and had the worst margin of:

-2.2 dBmV at 315.84 MHz in the **Horizontal** polarization for Normal operating mode, 30 to 2000MHz, 3 meters.

4.6 Radiated Emissions Test Result Data

4.6.1 Final Test Data for Normal Operating Mode, 30 to 2000 MHz, 3 meters.

INDICATED		TABLE	ANTENNA		CORRECTION FACTOR			CORRECTED AMPLITUDE	FCC 15.231	
Frequency	Ampl.	Angle	Height	Polar	Antenna	Cable	Amp.	Corr. Ampl.	Limit	Margin
MHz	dBmV/m	Degree	Meter	H/ V	dBmV/m	dB	dB	dBmV/m	dBmV/m	dB
315.84	76.3	0	1.5	H	15.9	3.7	22.4	73.5	75.7	-2.2
315.92	73.9	0	1.5	V	15.9	3.7	22.4	71.1	75.7	-4.6
947.48	32.7	0	1.5	H	24.4	3.7	22.7	38.1	55.7	-17.5
630.08	32.6	0	1.5	V	20.5	3.4	21.4	35.1	55.7	-20.5
947.24	28.4	0	1.5	V	24.4	3.7	22.7	33.8	55.7	-21.8
630.12	29.8	0	1.5	H	20.5	3.4	21.4	32.3	55.7	-23.3

Appendix A:

15.231C. 20dB bandwidth

Result: Complies with the requirement. ($306\text{kHz} < 0.25\%$ of 315.84 MHz)

Appendix B:

15.231(a). Activation time less than 5 seconds. Periodic Transmissions at regular predetermined intervals are not permitted.

Result: Complies with the requirement. (The EUT will stop transmission within 5 seconds)

5– FCC PRODUCT LABELING AND WARNING STATEMENT

5.1 FCC ID Label

Specifications: Text is black in color and is left justified. Labels are printed in indelible ink on permanent adhesive backing and shall be affixed at a conspicuous location on the EUT.

5.2 Proposed Label Location on EUT

EUT: Bottom View

5.3 FCC Warning Statement

The FCC Warning Statement is included in the product manual. A proposed sample of the statement is presented in Appendix D of this report as reference.

Appendix D – USER MANUAL

DOOR BEACON™ DOOR KNOCK TRANSMITTER

MODEL DBT300

Sends signal of knock up to 80 feet to remote wireless receiver(s).
*Use with DOOR BEACON™ DOOR KNOCK RECEIVER(S) MODEL DBR 300
Or ACCESS 3, MODEL ALR130 ALERTING DEVICE (Purchased Separately)*

Built in Light will flash to alert you of knock.
Vibration from each knock will active light to flash for several seconds.

Easy to Use.
Simply hang or fasten to door with bracket or Velcro included.

Battery Operated & Portable
Uses one 9 volt Alkaline Battery (purchased separately)

Model DBT300

DBT300/DBR300 features.**DBT300 silent chime w/transmitter.*****Function:***

As DBT300 is activated by door knocking, it may flash and transmit coded data out, transmitting range may up to 30 meters.

DBT electrical characteristics:

quiescent current : 0.7ma.

working current : 100-200ma.

rated voltage : 9VDC.

flashing duration : 2-3seconds.

DOOR BEACON™ DOOR KNOCK TRANSMITTER MODEL DBT300

Open Battery Compartment Cover and connect one 9 volt Alkaline Battery to terminals.
Insert Battery into compartment and reposition cover.

To attach the included "Over the Door" Wire Hanging bracket, Insert from bottom of unit and slide upward until bracket is secure in slots at bottom of unit. Unit may also be positioned on a door by using the Velcro included. Unit should be positioned on the inside of the door.

Slide switch to ON position to activate. Select High or Low Sensitivity. Unit should be in Off position when not in use.

Easy to set Selectable Frequencies are located inside battery compartment.
Set the numbered dip switches to match the receiver dip switches being used.
Different settings can be used to allow for use of more than one transmitter/receiver system without interference.

To replace the light bulb: (290 ma, 4.8 volt required; one replacement included)

- 1) Remove 4 screws in back of cabinet.
- 2) Remove Battery Compartment Cover and Cabinet back.
- 3) Remove screw in middle of circuit board
- 4) Lift printed circuit board.
- 5) Unscrew bulb (small pliers may be required)
- 6) Install replacement 290ma, 4.8Volt Light Bulb.

ONE YEAR LIMITED WARRANTY:

DOOR BEACON™ DOOR KNOCK TRANSMITTER Model DBT300 is warranted to be free from defects in material or workmanship for one year from the date of purchase. This warranty does not include light bulb. This warranty does not apply to any unit which has been used for other than its intended use, or has been subjected to misuse, negligence or accident, or has been opened or serviced by anyone other than an authorized GLOBAL ASSISTIVE DEVICES, INC. Service Center. GLOBAL ASSISTIVE DEVICES, INC. may select to replace the entire unit rather than repair it. Before sending unit for service, check to ensure that battery and/or light bulb do not need replacing. For service during the warranty period, return the unit, with proof of purchase date, in a secure package, insured and with shipping charges prepaid. No C.O.D. packages will be accepted. Include your return street address and a note describing the service required. Enclose \$7.50 (check, money order, Visa, Master Card or American Express) for domestic shipping and handling charges. Other countries please contact us for pricing.

Appendix E –AUTHORIZATION LETTER

November 14, 2000.

Federal Communications Commission
7435 Oakland Mills Road
Columbia, Maryland, 21046

Sir/Madam,

Re: FCC grant for Door Beacon Door Knock Signaler
Transmitter and Receiver

This letter is an authorization to accept Bay Area Compliance Lab. Corporation as an agent for GLOBAL ASSISTIVE DEVICES, INC., 4950 North Dixie Highway, Fort Lauderdale, Florida 33334, to sign applications before the Commission on our behalf, to make representations to you on our behalf, and to receive and exchange data between our company and the commission in connection with certification of the following Chinason product:

Door Beacon Door Knock Signaler Transmitter Model DBT300 and Door Beacon Door Knock Signaler Receiver Model DBR300.

Under FCC docket number 20780 and general docket number 80-284 pursuant to part 15, FCC rules and regulations.

Sincerely,

Brian Hewitt
President
