

TEST SETUP PHOTOGRAPHS

This document contains 4 photographs

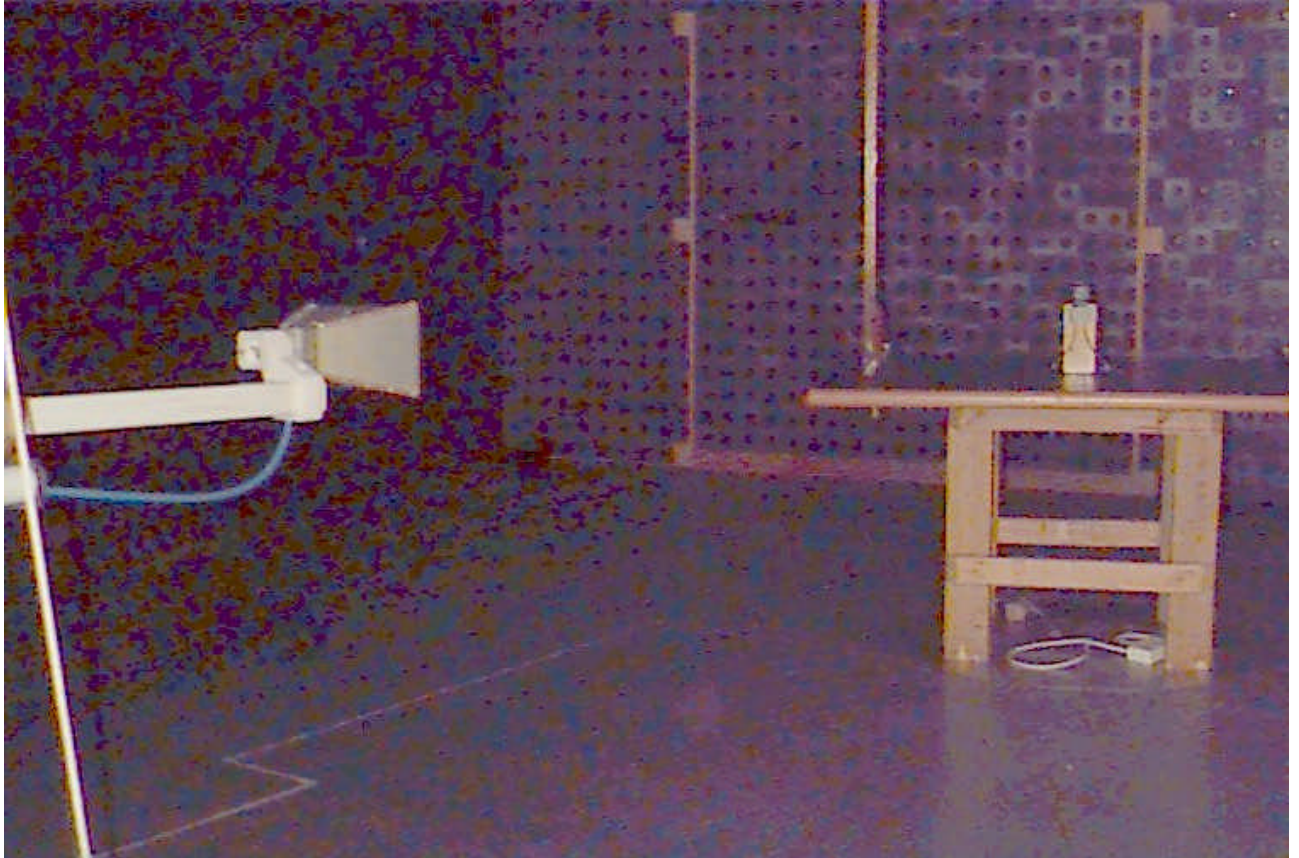

Photograph No.1
Radiated emission measurements test setup with loop antenna,
9 kHz – 30 MHz frequency range, anechoic chamber method

Photograph No.2
Radiated emission measurements test setup with biconilog antenna,
30 MHz – 2000 MHz frequency range, anechoic chamber method

Photograph No.3
Radiated emission measurements test setup with double ridge guide antenna,
2 GHz – 9.5 GHz frequency range, anechoic chamber method

Photograph No.4
Radiated emission measurements test setup, anechoic chamber method
