Re InterWave Communications UltraWAVE BTS, Model AUAC85

Request for withholding from public disclosure proprietary information submitted
pursuant to an application for certification of a BTS

FCC ID: OEWAUAC85

Dear Sir or Madam:

InterWave Communications Inc., requests that certain materials submitted with this application for certification of the UltraWAVE BTS, Model AUAC85 be withheld from public disclosure. This request is made under the provision of Section 0.457 (d) of the Commission's Rule and Section 552 (b) (4) of the Freedom of information Act, Trade Secrets.

The envelope marked "Confidential" contains detailed block diagrams, schematic diagrams, bill of materials(parts lists) and detailed theory of operation submitted to the FCC for review with this application. The information in this envelope contains proprietary information (trade secrets) regarding this product, which are the result of our extensive investment in research and development. Without the disclosed information, our competitors would take considerable more time to assess and develop a workable competitive product. As a result, we believe that disclosure of these company-guarded materials would compromise our leading position in this market.

We therefore formally request that the materials contained in this envelope be kept strictly confidential and not made available for inspection by any other party, except on a need to know basis for the sole purpose of the certification process.

Sincerely,

A handwritten signature in blue ink, appearing to read "George Chen", is written over a horizontal line.

Name: George Chen

Title: Director, Hardware Engineering
