

The top photograph shows a green printed circuit board (PCB) with three red push buttons. The board is populated with various electronic components, including resistors, capacitors, and integrated circuits. A white connector is visible on the left side. The bottom-left photograph shows a green PCB with a USB port and a circular component. The board is populated with various electronic components, including resistors, capacitors, and integrated circuits. The bottom-right photograph shows a small green PCB with a USB port and a circular component. The board is populated with various electronic components, including resistors, capacitors, and integrated circuits.
