Re: Programming Capability FCC ID: OKRMX950N5H

Dear FCC Representative,

The MX9 Series Base Station transceiver complies with 47CFR Part 90.203(e) in that the equipment operator cannot directly program transmit frequencies using the normally accessible external controls.

The end user will not be able to program the channel frequencies. Programming the allowable TX/RX frequencies in this equipment is the responsibility of a service shop or authorized agent using a special programming cable and computer software. The end user can only select from the preprogrammed channels. The software and programming cable are not available to the end operator.

Sincerely,

FOR AND ON BEHALF OF SPECTRA ENGINEERING Pty Ltd

Gary Jacobs

Managing Director
