X-band Doppler Module (MIC Type)

MODEL NO. NJR4170

<Description>

This specification covers the general requirements for microwave doppler module. This module is designed for motion sensing applications. This module consists of DRO (Dielectric Resonator Oscillator), balanced Schottky Barrier Diode Mixer and Micro-strip Patch Antennas.

<Specifications>

Electrical Characteristics (at +25 degree C, +5VDC)	Specifications
Operating Voltage	5.0 +/- 0.2VDC
Operating Current	30 mA typ.
Center Frequency	10.525GHz +/- 5MHz
Output Power	8mW E.I.R.P. typ.
Return Loss Sensitivity	-90 dBc
Second Harmonic Emission	< 25 mV/m [at3m]
Antenna Beamwidth (-3dB)	E-Plane 36 deg. H-Plane 72 deg.
Pulse Mode Operation	Specifications
Pulse Width	5 micro sec.
Duty Cycle	0.01
Absolute Maximum Ratings	Specifications
DC Input Voltage	+8 VDC
Operating Temperature Range	-30 to +70 degree C
Storage Temperature Range	-40 to +80 degree C

<Outline Drawing>

Pin Assignment
 1) Output
 2) GND
 3) +5VDC

Pin Assignment

- 1) Doppler signal output
- 2) Ground
- 3) +5VDC

- 1 Connect "Ground" to minus connector of power supply.
- 2 Connect "+5VDC" to plus connector of power supply.
- 3 Drive +5VDC.
- 4 This module outputs microwave from antennas on the front of it.
