RE: Request for Dismissal of Certification

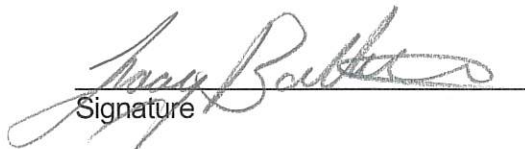

Manufacturer/Applicant: Listen Technologies Corporation
FCC ID: OMD800-004
Original Grant Date: 08/06/2024

Listen Technologies Corporation is requesting the dismissal of the application/FCC ID listed above.

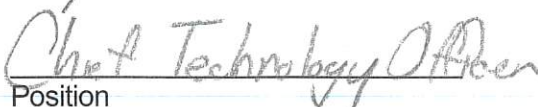

The following are the reasons behind our request:

After certifying the OMD800-004, Listen Technologies identified the need that a change was necessary to the original design to improve the VCO circuit. Although this change alters the original design, the updated version remains fully compliant with FCC regulations. The initial design was never manufactured or distributed; therefore, only the revised version will be placed on the market. For labeling consistency, Listen Technologies requests permission to retain the existing FCC ID (OMD800-004) for the updated version. Since the original design was not commercially released, we ask that the previous certification be dismissed, allowing reuse of the FCC ID OMD800-004. Certification for the revised design will be submitted promptly following the dismissal of the original, unused design.

Sincerely,
