

NAMSUNG Telecom Co., Ltd.

345-30, Gasan-Dong, Guemcheon-gu, Seoul, Korea

OPERATIONAL DESCRIPTION

The FM module allows the CD changer to operate through the FM band of any car stereo. To operate the FMT-100 FM module the car radio must be first tuned to the FM band at 89.1 MHz. If there is interference on this frequency, change the output frequency on the FM module to 88.7 MHz by moving the slide switch on the FM module to the 88.7 MHz position. Then tune the radio to 88.7 MHz, instead of 89.1 MHz when using the CD changer.

SPECIFICATIONS:

Output Frequency:	88.7/89.1 MHz (Switchable)
Power Supply:	12 V from car battery
Power Cord:	Unshielded DC power cord
