### 1. Battery Installation:

As in Fig. 1, push and slide open the cover of battery compartment. Please assure to install the batteries correctly in place. Replace the cover.

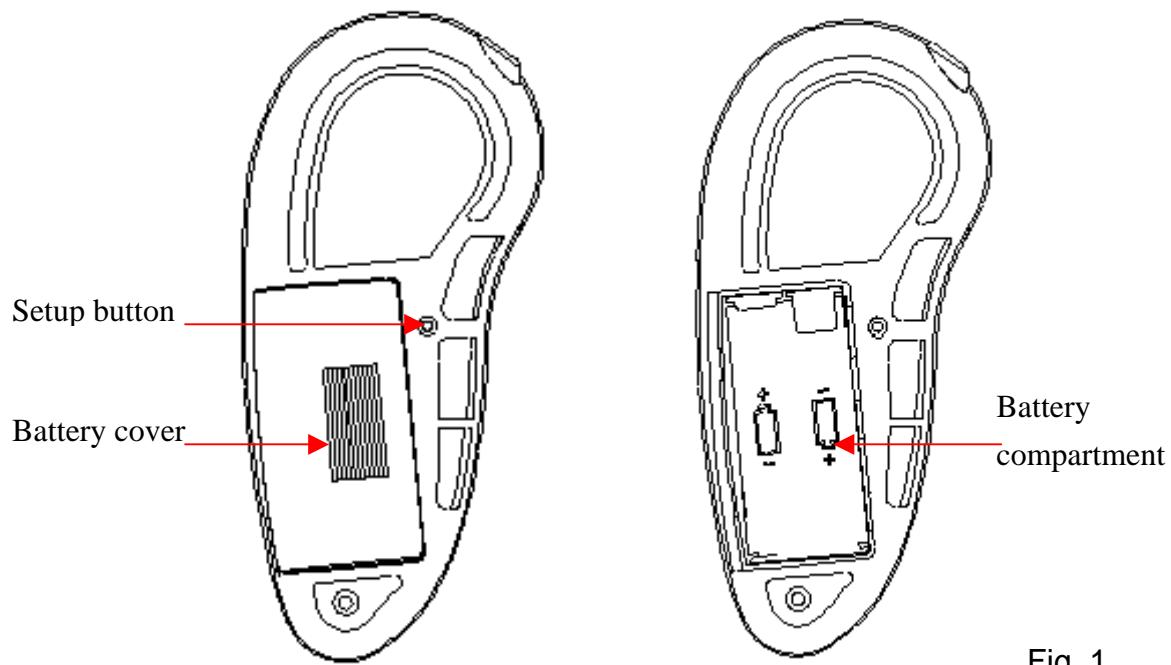

Fig. 1

2. Plug the receiver to the USB port of the computer. The LED light turns on showing that the computer has detected the new device.
3. Press and release the Setup button on receiver to turn off the LED light. (Fig.2)

4. Press the setup button located at the bottom of the device. The receiver's LED resumes glowing indicating that the setup has been completed.

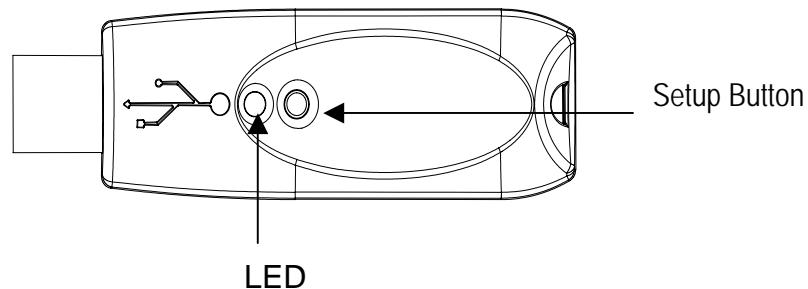

Fig. 2

## Functions

This device can be used as both handheld presenter and desktop trackball mouse. It has three function modes: Presentation, Mouse and Off modes.

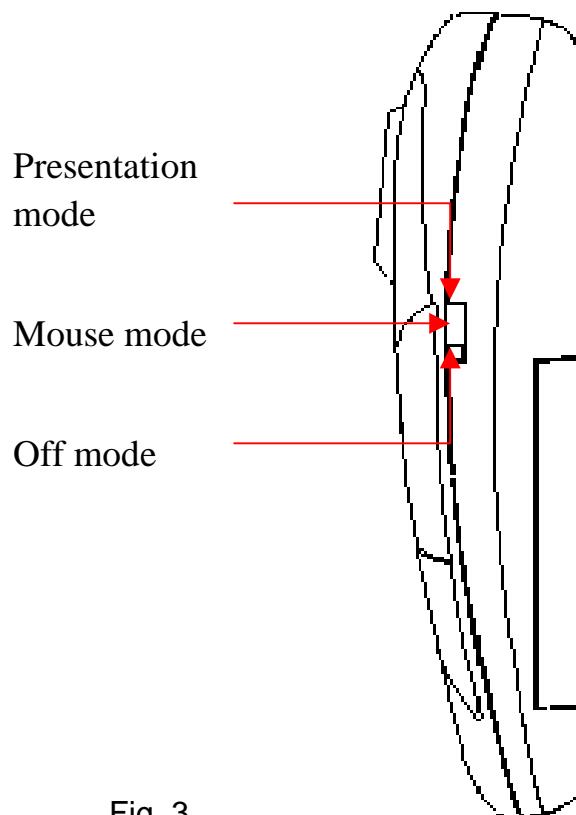

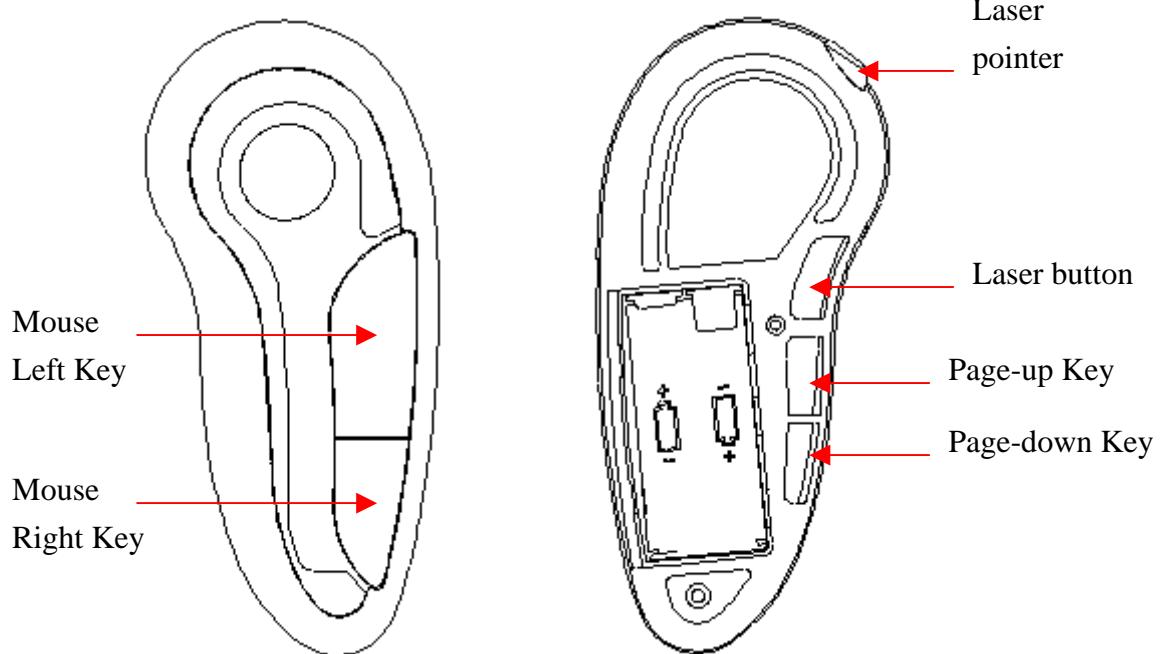

Fig. 3

## **Handheld Presentation Mode:**

Fig. 4

## **Desktop Trackball Mouse Mode:**

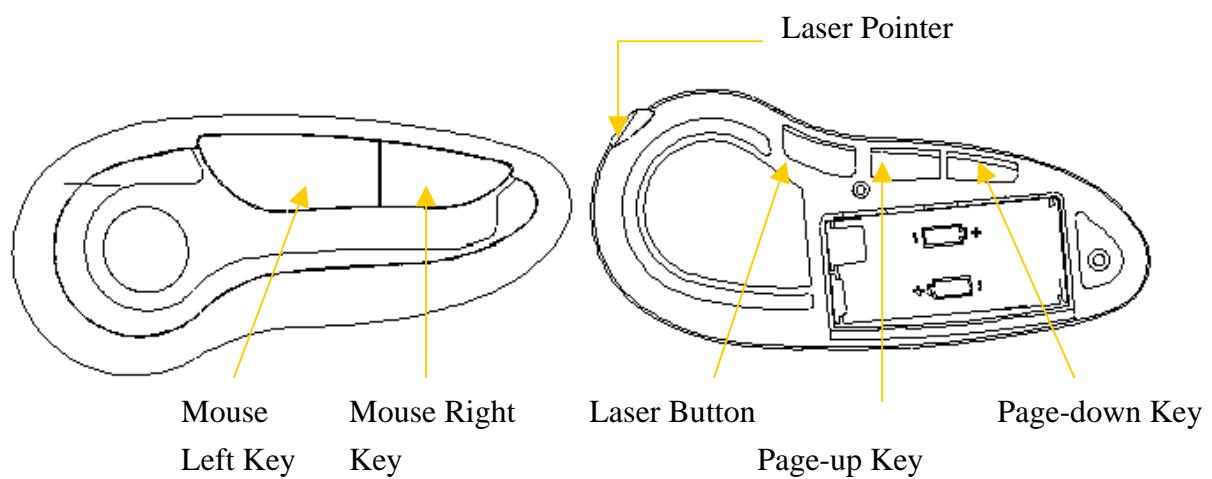

Fig. 5

## **Off Mode**

Switch to Off mode position and the power will be off. Entering off mode will save power consumption.

## FEDERAL COMMUNICATIONS COMMISSION

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

### NOTE

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter
