A circular green printed circuit board (PCB) is shown, densely populated with electronic components. A large, dark, square integrated circuit (IC) is positioned in the upper right quadrant. Numerous smaller components, including resistors, capacitors, and smaller ICs, are distributed across the board. Two black probes are connected to the board, and a small red and black wire is also visible. The board has several circular holes around its perimeter and a white cross symbol near the bottom center.
