Subject: Modification to the EUT

Gentlemen:

To successfully meet the radiated emission requirements of FCC Part 15.249, it was necessary to change R21 from 8.2 ohms to 19.1 ohms, R22 from 8.2 ohms to 19.1 ohms, and R23 from 143.0 ohms to 56.2 ohms. This attenuated the RF going into the antenna from 3db to 7 db.

This exact modification will be implemented and incorporated into our schematics and printed circuit board layout and will be contained in production devices when the product is released.

If you have any questions, please do not hesitate to contact us at (515-986-3250).

Sincerely,

James D. Benn
President
