

All models of **LUXLITE**[®] compact fluorescent lamps fits directly into any conventional incandescent bulb socket. Additional tooling or changes in fixtures is not necessary and ideal for hard to reach places like hall rooms, auditoriums, restaurants etc.

Precautions of the followings when installation

Never hold the glass tube for installation

Never install where water may drop on the lamp

Never install where ambient temperature may rise above 40°C

Unsuitable for applications where the lamps must be turned on and off frequently

Never use with the following fixtures

- Emergency light fixtures
- Direct current fixtures
- Dimming circuit fixtures
- Closed fixtures

FCC Warning Statement:

- (a) The interference potential of the device or system.
- (b) Maintenance of the system.
- (c) Simple measures that can be taken by the user to correct interference.
