Subject: Original Application for Certification of Low Power Transceiver
900 MHz Wireless Entertainment System, FCC ID: OU2CY6411

Gentlemen:

Enclosed find Cybiko Incorporated's Equipment Authorization dated January 21, 2000. This system is in compliance with Part 15, Subparts B and C and in accordance with Section 15.249 of the FCC Rules. Under separate cover we will mail FCC Form 159 with fee check in the amount of \$985 to cover cost of equipment authorization payment code EGC (\$940) and for grantee code payment code EAG (\$45).

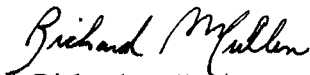

The subject composite system consists of the following three regulated parts: (1) 900 MHz transmitter subject to Certification with FCC ID; (2) 900 MHz monolithic superheterodyne receiver subject to Verification; and (3) Class B Computing Device Peripheral (i.e. serial interface port for hard wire connection to host PC) subject to DoC with FCC logo.

The 900 MHz transmitter portion of this system contains 60 channel FM transmission on 903.2~926.8 MHz frequency band with FSK modulation with permanently attached antenna. This system will be marketed with detachable 1.0m shielded serial interface cable with two bonded ferrite cores and Direct Plug-In AC Adaptor by Cybiko type CY6411-AD with DC cable with one bonded ferrite core.

This EUT was tested in accordance with ANSI C63.4-1992 to show compliance with FCC Parts 15C and 15B limits. The Transmitter tests were performed on channels 1 and 60 representing the low and high frequencies and channel 32 representing the middle frequency will be submitted shortly. Also, the Receiver and Class B Computing Device Peripheral system tests were performed in the receiving and connection to host PC computer system modes of operation.

Should you have any questions or comments, please contact the undersigned. Thank you for your attention and cooperation in this matter.

Sincerely yours,

Richard Mullen
