

WiFi Channel 12 and 13 Declaration Letter

WiFi Channel 12 and 13 Declaration Letter

We declare the equipment identified below with regards to Channel 12 and 13 capabilities for

FCC ID: OU5PCSW6

Declaration	
☒	Product hardware <u>does not</u> have the capability to operate on Channel 12 and 13.
☐	Product hardware has the capability to operate on Channel 12 and 13. However, these two channels will be disabled via software and will not be accessible to user.
☐	Product hardware has the capability to operate on Channel 12 and 13. However, all the operated channels can't be changed in the RF parameter via software. All channels have complied with all the requirements sets out in FCC Part 15.247.
☐	Product hardware has the capability to operate on WiFi Channel 12 and 13, and meets the requirements of KDB 594280 D01 v02r01. Please note: 1.) By default, this device operates in a mode that is compliant with the U.S. requirements. 2.) This device will also use supplemental information such as geo-location data to determine that it is operating outside the U.S., if necessary, to change its power. Such supplemental data will be derived from the following:
	☐ Global Navigation Satellite System (GNSS) sensors in the device\
	☐ Mobile Country Code (MCC), ⁸ or MCC with a Mobile Network code (MNC), received from a CMRS ⁹ carrier and received directly by a receiver on the device
	☐ Country information derived from multiple adjacent access points (for example using IEEE Std 802.11d provisions) may be permitted on case-by-case basis
	☐ Other suitable geo-location data based on IP addresses or other reliable source.
	Compliance is demonstrated in test report as the maximum transmit power is properly adjusted to comply with the out-of-band emission requirements in Part 15.247. The device is a WiFi client device that is not able to operate at different power levels as the default setting, which is not accessible to third-party.
