

Exhibit 11: RF Exposure/Environmental Evaluation

The 9XTREAM can be installed with the three different types of antennas listed below:

<u>Antenna Type</u>	<u>Model</u>	<u>Antenna Gain</u>
Small Dipole	900CDAN	2 dBi
Astron Monopole	AXQ900 PTL	2 dBi
Astron Dipole	AXH900 RPSMAR	2 dBi

The 9XTREAM is sold to OEM's for integration into their end products. The OEM's are instructed in the user manual provided with each unit that in order to comply with the RF exposure requirements the 9XTREAM must be installed with the antennas listed above and that a minimum 20-cm separation distance must always be maintained between the antenna and the user. Therefore, the 9XTREAM complies with RF Exposure/Environmental Evaluation requirements.
