

Kwok:

The user's manual for the CDH Model 9XTREAM has been modified to include a warning statement regarding the minimum separation distance of 20 cm in order to comply with the RF exposure requirements.

This new manual has been uploaded.

Also enclosed below is your original question, for your reference.

Re:	FCC ID OUR9XTREAM	
Applicant:		CDH
Communications Inc.

731 Confirmation Number:		EA96432
Date of Original E-Mail:		05/01/2000

Place your response in the RF exposure info folder of the electronic file.

CDH, EA 96432:

1. Their response on 3/9/00 indicated they had included sample operating instructions and requirements for OEM integrators to provide end-users. Latest response on 4/4/00 indicates the sample instructions do not exist because there is no potential OEM customers at this time. This modular transmitter will be approved for mobile transmitting configurations with respect to 2.1091, the operating instructions for this transmitter to satisfy RF exposure requirements (MPE) should not be dependent on specific OEM products. Grantee should inform OEM integrators that they are required to include the specific end-user instructions as indicated by the grantee, for OEM products to satisfy RF exposure requirements. These end-user instructions should be located at an obvious of the final product manual and similar to the following - "IMPORTANT: This device operates with a modular transmitter that must satisfy FCC RF exposure compliance requirements for mobile transmitting devices. The antenna of this device (modular transmitter) must be installed and operated with a separation distance of 20 cm or more from persons to satisfy the RF exposure requirements. Operations that do

not meet these requirements must be avoided." Please upload the above.

Proposed Grant Condition - This modular transmitter is approved for integration into products operating according to requirements of 2.1091.
