

Dear Diane,

We would like to request confidentiality for following matters:
block diagrams, part lists and all schematics.

Request for confidentiality is requested for original grant
issued 29.2.2000, FCC ID: OUWNETHAWK-N2

The information that has been delivered to FCC must be handle confidentially, because from that information competitor or another person can easily obtain detailed information how our product will work, which kind of design our product is based on, which components are needed to build our product and which are the critical components for our product.

With these information competitor can effect to us economical losses if he is planning same kind of product or if is obtaining itself our critical components so much that the operation will cause an allocation of components. This kind of operation of the competitor causes us very big economical losses, because our deliveries to customers will be delayed, we will lose market share to competitor and possible juridical tasks with competitor are needed. In the worst case losses in business transaction will shake our economy and we must give up the sections that have vital of importance to us and we must redesign our product so that it will based of new solutions.

Furthermore, the electrical design of our product is our own know-how and proprietary and it can be compared to the solution which can be patented.

The demanded time period for confidentially is ten years.

Best regards,

X-NET Oy
