

Federal Communications Commission
Authorization and Evaluation Division
1435 Oakland Mills Road
Columbia, MD 21046

Date: January 6, 2021

SUBJECT: FCC ID: OV9BSSPWZCR6, Label location justification

To Whom It May Concern:

Due to limited space on the exterior surface of the product, the FCC identifier is located on the Printed Circuit Board Assembly (PCBA) adjacent to the battery compartment.

This location is user accessible since the product operates from a disposable battery that must be installed and replaced by the user.

Also, the product is shipped with the back-mounting bracket uninstalled or in some cases without any back-mounting bracket since it would be already mounted on the end product.

Based on the information above, the FCC identifier is readily viewable as per 47 CFR 2.925 (d) at the time of the purchase and during its service life.

Sincerely,

Curtis Letniak
President
Spyder Controls Corp.
