Re: Additional Conversion Factors for Dosimetric E-Field Probe

Dear Lin,

Attached please find the additional conversion factors for your dosimetric E-field probe SN:1663 (based on our offer #1494). Should you have any additional questions, please do not hesitate to contact us. We are always honoured to offer our products and services to Kyocera Wireless.

Additional Conversion Factors for Dosimetric E-Field Probe

Type:

ET3DV6

Serial Number:

1663

Place of Assessment:

Zurich

Date of Assessment:

August 21, 2002

Probe Calibration Date:

February 21, 2002

Schmid & Partner Engineering AG hereby certifies that conversion factor(s) of this probe have been evaluated on the date indicated above. The assessment was performed using the FDTD numerical code SEMCAD of Schmid & Partner Engineering AG. Since the evaluation is coupled with measured conversion factors, it has to be recalculated yearly, i.e., following the re-calibration schedule of the probe. The uncertainty of the numerical assessment is based on the extrapolation from measured value at 900 MHz or at 1800 MHz.
