

FCC INFORMATION

FCC INFORMATION:
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not used these instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ~ Reorient or relocate the receiving antenna.
- ~ Increase the separation between the equipment and receiver.
- ~ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- ~ Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:
(1) this device must not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Model:W307

FCC ID:OVJW307

1

LOCATION OF CONTROLS

Unread Message

Incoming call Name(in English) & Phone No.

Sleep Mode

3

READ BEFORE USING WRISTBAND

- For the first time to use Activity Tracker, touch and hold for 5s to wake up the tracker and go to time mode. Time will default display 12:00.
- Each touching the mode will wake up the display and it will enter power saving mode automatically after no operation for 20s under any mode display.
- Clear all data(steps, calories burned, distance, target goal) of the day at midnight.
- Touch and hold for 5s at any mode, except Time Mode, it will enter sleep mode. At sleep monitor mode, touch and hold for 5s to wake up the wristband and go back to the mode before sleep monitor. When alarm rings under sleep mode, the vibration will also wake up the wristband.
- When in Sleep Mode, data could not be synced to the apps.
- Android Phones: after paired with wristband, the wristband could display incoming phone name in English and phone NO., quantity of missing call and unread message.

4

POWER SOURCE

The unit has a built in DC 3.7V Li-polymer rechargeable battery, recharge it before first time use (or when the battery was consumed, appear on the display) as follows:

- Take out the unit from the Watch Strap as the figure below:

- Connect the small round plug from the supplied Charging Cable to the DC IN Jack on the unit.
- Connect the full size USB plug to the USB port on a computer or any USB charger with DC 5V output. Charging will auto start. During charging, the scale bars on the Battery Power Meter will blink. When finished, it will stop blinking.

Notes:

- A. Your battery will last longer if you following these simple guidelines for charging and storing.
- B. Do not over charge (longer than 1 hour). Excessive charging or discharging may shorten the battery's life.
- C. Battery life naturally shortens slowly over time.
- D. The rechargeable battery incorporated in this product is not user replaceable.

5
