**Subject: Application of Class II Permissive Change for RADIO Certification of
*ARC-IM, ARC-JM and ARC-KM***

Applicant: STID

Product (PMN):

ARC-IM

ARC-JM

ARC-KM

Model (HVIN): ARC-AC1

FCC ID: OVNAC1

To Whom It May Concern:

We would like to submit the above product for Certification concerning FCC in Class II Permissive Change adding variant on a certified range of products.

Please review all required documents enclosed.

This range of product is a RFID reader at 13.56MHz composed with an electric board (SE2 or SE2 USB) which can have 3 options:

- RFID Panel
- RFID Panel + Keyboard (SE4)
- RFID Panel + Touch screen (SE5)

Additional functionality can be added by plugging a module into the products. There are 4 different modules:

- Biometric Module (SE6)
- 125kHz module (SE8) with FCC ID: OVNSE8
- QR Code module (SE9)
- 125kHz Multi technologies module (SE8M)

By combining the 3 options and the 4 modules, we obtain 16 references (see the table below).

	RFID Panel USB (SE2USB+SE3)	RFID Panel (SE2+SE3)	RFID Panel + Keyboard (SE2+SE4)	RFID Panel + Touch screen (SE2+SE5)
Without module	ARC-G	ARC-x3x-A ARC-A	ARC-x3x-B ARC-B	ARC-x3x-C ARC-C
With Biometric Module (SE6)	/	ARC-x3x-D ARC-D	ARC-x3x-E ARC-E	ARC-x3x-F ARC-F
With 125kHz module (SE8)	/	ARC-I	ARC-J	ARC-K
With QR Code module (SE9)	/	ARC-AQ	ARC-BQ	ARC-CQ
With 125kHz module Multi technologies (SE8M)	/	ARC-IM	ARC-JM	ARC-KM

The ARC-Y reference replace AR-x3x-Y reference. This evolution of reference was made to simplify the references of the products.

ARC-x3x-A (ARC-A), ARC-x3x-B (ARC-B), ARC-x3x-C (ARC-C) ARC-x3x-D (ARC-D), ARC-x3x-E (ARC-E), ARC-x3x-F (ARC-F), ARC-I, ARC-J, ARC-K, ARC-AQ, ARC-BQ and ARC-CQ products are already certified FCC OVNAC1.

Compliance for RF exposure requirement was demonstrated in this test report.

If you have any queries, please do not hesitate to contact us.

Regards,

Sylvain Poitrat
Technical Director
