**Report of Measurements
of Electromagnetic Compatibility Testing**

Test Report File No. : **NC3952** Date of issue: March 22, 2000
Applicant : Nortech International
Model / Serial No. : ATR434P/0990416880, FCC ID: OW9ATR434P
Product Type : Transceiver
Power Supply : 12-24Vdc
Manufacturer : Same as Applicant
License holder : Same as Applicant
Address : 32A Wiganthorpe Road
: Pietermaritzburg 3201 South Africa,
Test Result : ☒ **Positive** ☐ **Negative**
Test Project Number : 99ME43512
References(s)

Underwriters Laboratories Inc. authorizes the above-named company to reproduce this Report provided it is reproduced in its entirety.

Underwriters Laboratories Inc. reports apply only to the specific samples tested under stated test conditions. It is the manufacturer's responsibility to assure that additional production units of this model are manufactured with identical electrical and mechanical components. Underwriters Laboratories Inc. shall have no liability for any deductions, inferences or generalizations drawn by the client or others from Underwriters Laboratories Inc. issued reports.

This report is the confidential property of the client. As a mutual protection to our clients, the public and ourselves, extracts from the test report shall not be reproduced except in full without our written approval. This report shall not be used by the client to claim product endorsement by NVLAP or any agency of the US government.

1.0 G E N E R A L - Product Description

The Device Under Test, Model ATR434P Serial Number 0990416880 is a low power intentional Transmitter/Receiver used to identify a vehicle as it enters a toll plaza. This device is base station mounted in the toll plaza. The unit is powered by 12V dc.

1.1 Device Configuration During Test

The Device Under Test is a stand-alone device which was placed on a wooded table and set to transmit continuously. A communications cable was attached to a lap top computer which was placed outside of the test chamber. The computer used is a Toshiba, Model Number PRT800U. This unit has a Declaration of Conformity on file with the FCC.

"The results contained in this report reflect the results for this particular model and serial number. It is the responsibility of the manufacturer to ensure that all production models meet the intent of the requirements detailed within this report."

1.1.1 Deviations from ANSI C63.4 Standard Test Set-up

☒ None

☐ As described below:

1.2 Device Modifications Necessary for Compliance

☐ N/A

☒ As described below:

Resistor R42 changed to 7.5k Ω to comply with Radiated Emissions Criteria.

Environmental conditions in the lab:

	<u>Range</u>
Temperature:	20-25°C
Relative Humidity	30 - 60 %
Atmospheric pressure	680 - 1060 mbar
