The MASTR III 800 MHz T/R shelf is mounted in the station cabinet using Isolator Kit 350A1350G1, which provides rubber isolators, needed at 800 MHz to dampen vibrations. This kit also provides grounding strap SXA 104 7504/1. This grounding strap is used with the lower isolator on the right rail only. As shown above, this strap (Item 8) slips over each end of the isolator studs with the loop oriented toward the outside cabinet wall.
