

Prepared by NSWS Mikael Ohlsson	Document number	
Document responsible/Approved NSWS Tomas Blom	Date 2002-01-25	Rev A

Notes, FCC Authorization, LSE039R2 Compact Flash.

1. The Compact Flash, OXTLSE039R2, have to be seen as a modular approval, it is intended for laptop's, PDA:s, desktop PC's and other "type 1" compact flash host enabled devices to interface to Bluetooth. The Compact flash fulfills the criteria for modular approval (own RF-shielding, own power supply regulation, permanently affixed antenna, stand-alone test report, own FCC-label etc.) The Compact flash card tested with a laptop computer and an external jig as a platform must not be seen as a system. The Compact Flash is a unique product. **For reference, see the already FCC-approved OXTLSE039 modular approved Compact Flash Card.**
2. FCC label – On our previous FCC authorized products it has, due to the label size, been approved to only state: "FCCID:LSE0xx" on the marking label. Since the devices/markings labels are too small to place the required text according to part 15.19(a) (3), the information required by this paragraph will be placed in the user's manual. This will be FCC accepted according to part 15.19(a) (5). The following text will be added in the user's manual for OXTLSE044: *This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.*
