Re: Preco WideBand PreView Models WBPV 2010, 2015, and 2020
FCC ID: OXZWBPV2006

To whom it may concern:

Preco Electronics respectfully requests that under the provision of 47 CFR 0.459, the documents listed below and attached with this application for certification be provided with confidential status.

The items listed below contain detailed schematic diagrams submitted to the FCC for review with this application. These schematics contain proprietary information regarding the circuit operation and capabilities that are the result of Preco's extensive investment in research and development. Without the disclosed information, competitive organizations would take considerably more time to assess and develop a competitive product.

Since the WideBand PreView is filled with urethane potting and the internal components are not accessible without them being destroyed we would like to hold the internal photographs (Internal Photos.pdf) confidential.

We therefore formally request that the materials listed below be kept strictly confidential and not made available for inspection by any other party, except on a need to know basis for the sole purpose of the certification process.

Confidential Items:

- Schematics.pdf
- Operational Description.pdf
- WBPV Block Diagram.pdf
- Internal Photos.pdf

Sincerely,

Dale Hessing
Vice President of Engineering
