Response to comments of:

RE: ATCB015980 – Original Equipment Certification Application

FCC ID: OYE-MEL315 for Miller Edge Inc.

After a review of the submitted information, I have a few comments on the above referenced Application.

1 See next page..

For Your Information – Table 6 in the submitted test report shows the wrong emission limit for the emissions at 1575 MHz, 2205 MHz and 2835 MHz. These previous frequencies are in the restricted bands listed in Section 15.205 of the FCC Rules and the limits are 5000 uV/m @ 3m (peak) and 500 uV/m @ 3m (average) not the levels shown in the table. Since none of the reported emission levels are above 500 uV/m @ 3m, I will ignore this problem. However I will place a copy of this FYI into the test report exhibit to explain how these levels show compliance.
