

MAIN FEATURES

- Full function Radio Control

Contents:

- Instruction Manual
- Transmitter
- Golf Cart

⚠ WARNING:
CHOKING HAZARD – Small parts.
Not for Children under 3 years.

"This product is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC."

Safety Precautions:

- Parents, this toy is recommended for children. To ensure that your child's play is both safe and fun, please review the operating instructions with your children.
- **DO NOT** pick up moving vehicle
- Keep hands, hair and loose clothing away from the tires and the wheel hubs when power switch is turned **ON**.
- Remove battery from transmitter and vehicle when not in use.
- **DO NOT** operate your vehicle on street. Avoid hitting people, pets or home furnishings.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Cautions:

- Non-rechargeable batteries are not to be recharged.
- Rechargeable batteries are to be removed from the toy before being charged.
- Rechargeable battery are only to be charged by an adult.
- Different types of batteries or new and used batteries are not to be mixed.
- Only batteries of the same or equivalent type as recommended are to be used.
- Batteries are to be inserted with correct polarity.
- Exhausted batteries are to be removed from the toy.
- The supply terminals are not to be short-circuited.

Care and Maintenance:

- Always remove batteries from the toy when it is not being used for a long period of time.
- Wipe the toy gently with a clean damp cloth.
- Keep the toy away from direct sunlight and/or direct heat.
- Do not submerge the toy into water that can damage the electronic assemblies.

Note:

- Parental guidance is recommended when installing or replacing batteries.
- New and alkaline batteries are recommended to use in this toy to obtain best and maximum performance.
- You are advised to replace with new batteries as soon as the function becomes impaired.
- Users should keep and retain this information for future reference.
- Users should keep strict accordance with the instruction manual while operating the product.
- Under the environment with electrostatic discharge, the sample may malfunction and require user to reset the sample.

Special Note to Adults:

- This toy is not intended for children under 3 years old.
- This toy must only be used with the recommended transmitter.

Battery requirement for Transmitter:

 Power Supply : 
Rating : DC9V 0.3W
Battery : 1 x 9V 6LF22 / 6AM6
Requires 1 x 9V alkaline battery
(not included)

Battery requirement for Vehicle:

 Power Supply : 
Rating : DC1.5V 0.6W
Battery : 1 x 1.5V "AAA"/LR03/AM4
Requires 1 x 1.5V "AAA" size alkaline battery
(not included)

FCC Statements

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- 1) This device may not cause harmful interference, and
- 2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Vehicle

Transmitter Battery Cover

ON/OFF Switch

Getting Started

Batteries:

- The Vehicle is powered by 1 x 1.5V "AAA" size alkaline battery.(not included)
- The Transmitter is powered by a 9V alkaline battery. (not included)

Battery Installation: Vehicle

Make sure the power switch is on "OFF" position

1. The battery compartment is located inside the chassis.
2. Use a phillip's head(Cross-Head) screwdriver to loosen screw in counter-clockwise and remove the chassis from the case.(pic.1)
3. Insert new "AAA" size alkaline battery with "+" & "-" signs as shown inside the battery compartment. (pic.2)
4. Close the chassis use a phillip's head(Cross-Head) screwdriver.

1 x 1.5V "AAA" size
alkaline battery

Battery Installation: Transmitter

1. Push to remove the battery compartment cover.(pic.3)
2. Insert new 9V alkaline battery with "+" & "-" signs as shown inside the battery compartment (pic.4)
3. Replace the battery compartment cover.

1 x 9V alkaline battery

Start to play :

- Switch on the Vehicle.
- Steer the Vehicle by pressing the control buttons of the transmitter in different combinations to activate actions.
- For best results, hold antenna up, do not point down toward the Vehicle.
- After use, switch off the Vehicle.
- If the Vehicle is to be "parked" for a relatively long time, remove all batteries from the Transmitter and the Vehicle.
- You can adjust the steering pin on bottom of the Vehicle for better forward straightness.(pic.5)

Steering driving:

Button of the Left side	Button of the Right side	Action
△	△	↑
▽	▽	↓
△	◁	↶
△	▷	↷
▽	◁	↵
▽	▷	↽

Driving Tips:

- Operate your vehicle only on flat, smooth (but not slippery) dry surface.
- The vehicle's actions may vary in different playing surfaces.
- For the best result, hold the antenna up, do not point down toward the vehicle.
- Don't touch (hold) the antenna of transmitter.
- Don't drive your vehicle in sand or through water or snow, if your vehicle get wet, wipe with a towel and allow to dry completely.
- When your vehicle runs erratically, the problem is usually the result of interference caused by high tension wires, radios or other R/C cars running close by on the same frequency as yours. You may have to choose an alternate place to race.
- Do not operate near concrete walls which may disturb transmission.

Trouble Shooting:

Symptom	Cause	Correction
Vehicle does not react, or react poorly to operation by transmitter.	• High-frequency interference occurred near to high-voltage lines, transformers and some types of building.	• Avoid these if possible, or choose another place to operate the vehicle.
Loss of control.	• Another radio control vehicle using the same frequency and channel is operated near your vehicle. • Out of the control range of distance.	• Race against other vehicles using different frequencies or channel. • Move to another place where without radio frequency interference from another device. • Ensure the antenna is fully extended. The vehicle runs up to 5 meters or 15 feet in open space.
Vehicle runs slowly, erratically or does not run.	• Loose battery connection. • Main power switch is not in "ON" position. • Batteries are not placed in compartment correctly. • Hair, carpet or dirt might be trapped between wheels.	• Check battery connection. • Switch on the power. • Check the battery polarity. • Replace all old batteries with new ones. • Carefully remove such foreign materials.
