

FCC ID: P24RTH-0629

Operation Description:

There are a on/off switch and two control sticks on the EUT. Turn on the switch, press the left control sticks to control the forward movement, press the right control stick to control the backward and rotation movement.

Circuit Description:

The brief circuit description is listed as follows:

- C*, R9, Q3 and associated circuit act as Local Oscillator.
- Q4 and associated circuit act as RF Amplifier.
- Q1, Q2 and associated circuit act as modulation signal generator.

Antenna Used:

A permanent wire antenna has been used.
