

FCC Class II Permissive Change Request Letter

2026/03/10

To FCC:

RE: FCC Permissive II Change Request for Company: Sercomm Corporation
FCC ID: P27-TMOG5SEM

We are submitting an application for a class II permissive change to the FCC approval of the Company name: Sercomm Corporation, product description: G5SEM-V (FCC: P27-TMOG5SEM, Original Grant Date: 04/30/2025). The launch module has modified some EMC circuits, with specific differences as follows:

- 1.Change the storage IC from DDR4 to DDR5, it is not pin to pin, but no change other parts including RF design.
- 2.Add a second supplier for the N41 RF switch.
- 3.Add a second supplier for the storage IC DDR5
- 4.Add a second supplier for the storage IC eMMC.
- 5.Disable the combination of DC_66A_n25A and DC_2A_n66A using software

The second supplier 's materials mentioned above are all pin to pin replacements.

Sincerely,

Nick Wu, Engineer
Sercomm corporation
