

HEATED GEAR 3.5 AH BATTERY W/ APP CONTROL

BLOC-PILES DE 3,5 AH POUR VÊTEMENTS CHAUFFANTS AVEC COMMANDE D'APPLICATION

BATERÍA DE 3,5 AH PARA PRENDAS CALEFACTADAS CON CONTROL DE APLICACIÓN

IMPORTANT SAFETY INSTRUCTIONS

SAVE THESE INSTRUCTIONS

**⚠WARNING READ AND UNDERSTAND ALL INSTRUCTIONS.** Failure to follow all instructions listed below, may result in electric shock, fire and/or serious personal injury.

1. **SAVE THESE INSTRUCTIONS** - This manual contains important safety and operating instructions for the MILWAUKEE heated gear battery.
2. **Only connect compatible MILWAUKEE heated gear to the heated gear connector ports on the heated gear battery. Do not use counterfeit, aftermarket, or "knockoff" products or heated gear. Other battery types could explode. Do not wire a battery to a power supply plug or car cigarette lighter.**
3. **Keep batteries out of the reach of children.**
4. **Before using the heated gear battery, read all manuals and labels for the heated gear battery, heated gear, or device.**
5. **Use only with Listed/Certified Power Supply.**
6. **Avoid dangerous environments.** Do not expose to or charge in rain, moisture, snow, damp, or wet locations. Do not use battery or charger in the presence of explosive atmospheres (gaseous fumes, dust, or flammable materials). Sparks may be generated when inserting or removing battery, possibly causing fire.
7. **Only charge in a well ventilated area and within the Recommended Ambient Charging Temperature range.** Do not block vents; keep them clear for proper ventilation. Do not allow smoking or open flames near a charging battery. Vented gases may explode.
8. **Maintain charger cord.** Pull plug rather than cord to unplug. Never carry charger by its cord. Keep cord from heat, oil and sharp edges. Ensure cord will not be stepped on, tripped over, damaged, or stressed. Do not use charger with damaged cord or plug. Replace damaged cords immediately.
9. **Use only recommended attachments.**
10. **Unplug when not in use, and before cleaning or maintenance.** Do not allow water to flow into AC/DC plug. Use a Ground Fault Circuit Interrupter (GFCI) to reduce shock hazards.
11. **Do not burn, incinerate, or expose batteries to fire or excessive temperatures above 265°F (130°C).** Batteries may explode. Toxic fumes and materials are created when batteries are burned.
12. **Do not crush, drop, shred, modify, or damage battery. Always securely contain batteries during transport.** Do not use a battery that has received a sharp blow, been dropped, run over, or damaged in any way (e.g., pierced with a nail, hit with a hammer, stepped on, in a vehicle accident). Do not use or charge batteries that appear damaged or swollen, or are not functioning properly. Damaged or modified batteries may exhibit unpredictable behavior.
13. **Do not disassemble or attempt to repair batteries or chargers.** No internal serviceable parts. Take batteries/chargers that have been damaged, broken, or need repair to a MILWAUKEE service facility to ensure the safety of the product is maintained.
14. **Battery chemicals cause serious burns.** Never allow contact with skin, eyes, or mouth. If a damaged battery leaks battery chemicals, use rubber or neoprene gloves to dispose of it. If skin is exposed to battery fluids, wash with soap and water and rinse with vinegar. If eyes are exposed to battery chemicals, immediately flush with water for 20 minutes and seek medical attention.
15. **Do not short circuit.** A short-circuited battery may cause fire, personal injury, and product damage. A battery will short circuit if a metal object makes a connection between the positive and negative contacts on the battery. Do not place a battery near anything that may cause a short circuit (e.g., coins, keys, nails, or small metal objects in a pocket, toolbox, or drawer).
16. **Do not allow fluids to flow into battery.** Corrosive or conductive fluids, such as seawater, certain industrial chemicals, and bleach or bleach-containing products, etc., can cause a short circuit. Do not use batteries that have been exposed to these types of fluids.
17. **Disconnect the heated gear battery from compatible MILWAUKEE heated gear before storing.** Such preventive safety measures reduce the risk of starting the devices accidentally.
18. **Before washing heated gear, always disconnect and remove the heated gear battery.**
19. **Store the battery** in a cool, dry place. Do not store where temperatures may exceed 120°F (50°C) such as in direct sunlight, or a vehicle or metal enclosure during the summer.
20. **Always ship Li-Ion batteries in accordance with the current regulations governing the chosen mode of transport (e.g. ground, air, sea).** When in doubt, contact MILWAUKEE, the carrier or other trained Dangerous Goods professional to determine applicable regulations.
21. **Maintain labels and nameplates.** These carry important information. If unreadable or missing, contact a MILWAUKEE service facility for a replacement.

**FC Federal Communications Commission**  
Pursuant to part 15.21 of the FCC Rules, you are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the product. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:  
•Reorient or relocate the receiving antenna.  
•Increase the separation between the equipment and receiver.  
•Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.  
•Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules and ISED-Canada's license exempt RSS standards. Operation is subject to the following two conditions: 1) This device may not cause harmful interference, and 2) This device must accept any interference received, including interference that may cause undesired operation.

FCC& IC Radiation Exposure Statement:

This equipment complies with FCC and Canada radiation exposure limits set forth for an uncontrolled environment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

**⚠WARNING** Only connect compatible MILWAUKEE heated gear to the heated gear connector ports on the heated gear battery. Do not use counterfeit, aftermarket, or "knockoff" products or heated gear. Other battery types could explode. Do not wire a battery to a power supply plug or car cigarette lighter.

Before washing compatible heated gear, always disconnect and remove the battery.

Using with Compatible Heated Gear

Insert the power cable (from inside the compatible heated gear's battery holder pocket) into the heated gear connector ports on the MILWAUKEE heated gear battery.

Place the heated gear battery into the pocket and close it.

To remove the battery, open the pocket and unplug the battery.

Pairing with Bluetooth

To pair, press and hold the Bluetooth activation button for two seconds. The bluetooth indicator will flash. Once successfully paired to a device the bluetooth indicator will illuminate solid and turns off. If pairing is unsuccessful the bluetooth indicator will flash and turns off. To unpair, use paired device to disconnect or press and hold the Bluetooth activation button for four seconds. The bluetooth indicator will flash and turn off.

Fuel Gauge

Insert or remove the connector ports from the battery to display battery's remaining power. When the battery has no more power, the fuel gauge will not light.

When to Charge the Heated Gear Battery

MILWAUKEE batteries do not develop a "memory" when charged after only a partial discharge. It is not necessary to run down the heated gear battery before charging.

- Use the fuel gauge to determine when to charge.
- You can "Top-Off" the heated gear battery charge before use.
- The only time it is necessary to charge the heated gear battery is when it has reached the end of its charge or before storing. Charge as needed.

Charging the Heated Gear Battery

1. Plug the USB-C cable into a power source such as an AC wall adaptor, computer, or car port.
2. Insert the other USB-C end of the cable into the USB-C port in the heated gear battery.
3. The fuel gauge light will display the charging status:
  - Charge time depends on capacity of battery. Heavily cycled batteries may take longer to charge completely.
  - If the light indicators do not illuminate or Lights 1&3 / 2&4 flashing alternately indicates a fault. Check that the charging cable is securely plugged in. If the light indicators still do not illuminate, unplug the charging cable for at least 2 minutes. After 2 minutes plug the charging cable back in. If after these attempts the light indicator still does not illuminate or shows fault, contact a MILWAUKEE service facility.

Transport

The regulations pertaining to the transport of Li-ion batteries are affected by whether the battery is transported in a personal vehicle or offered for shipment via a commercial carrier. Always ship Li-Ion batteries in accordance with the current regulations governing the chosen mode of transport (e.g. ground, air, sea). When in doubt, contact MILWAUKEE, the carrier or other trained Dangerous Goods professional to determine applicable regulations.

The personal transport of Li-Ion batteries is allowed when done in accordance with these warnings and instructions. When shipping Li-Ion batteries with a commercial carrier, they are shipped under classification UN 3480 (battery only) or UN 3481 (batteries contained in or packed with equipment). The proper packaging, labeling, marking, and documentation requirements are generally dependent upon whether the particular batteries are rated greater than or less than 100 Wh. Often, Li-Ion batteries rated 100 Wh or less are "excepted" from certain shipping regulations. In the U.S., products shipped via ground transport may be "excepted" from certain hazardous material shipping regulations if they are under 300Wh.

Maintenance

**⚠WARNING** To reduce the risk of fire, personal injury, and product damage do not allow fluids to flow into battery. Corrosive or conductive fluids, such as seawater, certain industrial chemicals, and bleach or bleach containing products, etc., can cause a short circuit. Do not use batteries that have been exposed to these types of fluids.

Always unplug the heated gear battery when not in use and before performing any cleaning or maintenance. Do not disassemble or attempt to repair the heated gear battery. Contact a MILWAUKEE service facility for ALL repairs.

Maintenance and Storage

Do not expose the heated gear battery, tool, or heated gear to water, rain, moisture, or allow them to get wet. This could damage the heated gear battery, tool, and heated gear. Do not use oil or solvents to clean or lubricate battery. The plastic casing will become brittle and crack, causing a risk of injury.

Store your heated gear battery in a cool, dry place. Charge and disconnect the heated gear battery from heated gear before storing. Remove from heated gear when not in use. Store batteries at room temperature away from moisture. Store batteries flat. Do not store in damp locations where corrosion of terminals may occur. As with other battery types, permanent capacity loss can result if the battery is stored for long periods of time at high temperatures (over 120°F/50°C). After about a year of storage, charge the battery as normal.

Repairs

The heated gear battery has no internal serviceable parts. For repairs, return the heated gear battery to the nearest authorized service center.

**⚠WARNING** To reduce the risk of injury or explosion, never burn or incinerate a battery even if it is damaged, dead or completely discharged. When burned, toxic fumes and materials are created.

Disposing of MILWAUKEE Li-Ion Batteries

MILWAUKEE Li-Ion batteries are more environmentally friendly than some other types of power tool batteries. Always dispose of your battery according to federal, state and local regulations. Contact a recycling agency in your area for recycling locations. Even discharged batteries contain some energy. Before disposing, use electrical tape to cover the terminals to prevent the battery from shorting, which could cause a fire or explosion.

RBRC Battery Recycling Seals

The RBRC™ Battery Recycling Seals (see "Symbology") on your tool batteries indicate that MILWAUKEE has arranged for the recycling of that battery with the Rechargeable Battery Recycling Corporation (RBRC). At the end of your battery's useful life, return the battery to a MILWAUKEE Branch Office/Service Center or the participating retailer nearest you. For more information, visit the RBRC web site at [www.rbrc.org](http://www.rbrc.org).

Accessories

**⚠WARNING** Use only recommended accessories. Others may be hazardous.

For a complete listing of accessories, go online to [www.milwaukeetool.com](http://www.milwaukeetool.com) or contact a distributor.

LIMITED WARRANTY USA & CANADA

Every MILWAUKEE Battery Pack (sold with cordless product and/or as a replacement battery pack) is warranted to the original purchaser from an authorized MILWAUKEE distributor only to be free from defects in material and workmanship. Subject to certain exceptions, MILWAUKEE will repair or replace a battery pack which, after examination, is determined by MILWAUKEE to be defective in material or workmanship for the stated warranty period from date of purchase. Return of the battery pack to a MILWAUKEE factory Service Center location or MILWAUKEE Authorized Service Station, freight prepaid and insured, is required. For the proper shipping procedure of battery packs, contact 1.800.SAWDUST (1.800.729.3878), or go to [www.milwaukeetool.com](http://www.milwaukeetool.com). A copy of the proof of purchase should be included with the return product. This warranty does not apply to damage that MILWAUKEE determines to be from repairs made or attempted by anyone other than MILWAUKEE authorized personnel, misuse, alterations, abuse, normal wear and tear, lack of maintenance, or accidents.

| 48-11-0100, 48-11-1024, 48-11-1830 (Serial number prefix "E95"), 48-11-1970, (48-11-2230)                                                                                                                                                                                        | Nickel-Cadmium (Ni-Cd), Nickel-Metal-Hydride (Ni-MH), LITHIUM-ION | One (1) Year                                               |

\*The warranty period for MILWAUKEE M18™ 48-11-1828 (with the serial number prefix "B41D" and earlier), V18™ 48-11-1830 (with the serial number prefix "A95"), and V28™ 48-11-2830 (with the serial number prefix "A71") is five (5) years / 2000 charges from the date of purchase, whichever first occurs. The first 1000 charges or 2 years of the warranty, whichever first occurs, are covered through free replacement of the battery pack. This means that for the earlier of the first 1000 charges or two (2) years of the warranty, whichever first occurs, a replacement battery will be provided to the customer for any defective battery free of charge. Thereafter, the remaining charges up to a total of 2000 or the remainder of the five (5) year period from the date of purchase, whichever first occurs, will be covered on a pro rata basis. This means that every customer gets an additional 1000 charges or three (3) years of pro rata warranty on these battery packs, depending on the amount of use. MILWAUKEE M18™ 48-11-1828 (with the serial number prefix "B41E" and later), V18™ 48-11-1830 (with the serial number prefix "E95"), and M28™ 48-11-2830 (with the serial number prefix "C71") will have different warranty periods, as listed.

Warranty Registration is not necessary to obtain the applicable warranty on a MILWAUKEE battery pack. MILWAUKEE does not allow limitation of the amount of use. MILWAUKEE does not imply any limitation on the amount of use. The manufacturer of the product will be used to determine the warranty period if no proof of purchase is provided at the time warranty service is requested.

ACCEPTANCE OF THE EXCLUSIVE REPAIR AND REPLACEMENT REMEDIES DESCRIBED HEREIN IS A CONDITION OF PURCHASE OF THE MILWAUKEE BATTERY PACK. MILWAUKEE PRODUCT, IF YOU DO NOT AGREE TO THIS CONDITION, YOU SHOULD NOT PURCHASE THE PRODUCT. IN NO EVENT SHALL MILWAUKEE BE LIABLE FOR ANY INCIDENTAL, SPECIAL, CONSEQUENTIAL, OR PUNITIVE DAMAGES, OR FOR ANY COSTS, ATTORNEY FEES, EXPENSES, LOSSES OR DELAYS ALLEGED TO BE A RESULT OF ANY DAMAGE TO, FAILURE OF, OR DEFECT IN ANY PRODUCT. THIS INCLUDING, BUT NOT LIMITED TO, ANY CLAIMS FOR LOSS OF PROFITS. ### Chargement du bloc-piles pour vêtements chauffants

- Brancher votre câble USB-C à une source d'alimentation telle qu'un adaptateur mural de CA, un ordinateur ou bien un port de voiture.
- Insérer l'autre bout du câble USB-C dans le port USB-C du bloc-piles pour vêtements chauffants.
- Le voyant d'autonomie affichera l'état de la charge :
  - Letemps de chargement dépend de la capacité du bloc-piles. Les blocs-piles qui ont été assez mis sous tension pourront prendre plus de temps pour être complètement chargés.
  - Si les voyants électroluminescents ne s'allument pas ou les voyants 1 et 3 / 2 et 4 clignotent en alternance, cela veut dire qu'un échec s'est passé. Constater que le câble de chargement est bien inséré. Si les voyants électroluminescents ne s'allument toujours pas, débrancher le câble de chargement au moins 2 minutes. Après 2 minutes, brancher le câble de chargement à nouveau. Si le problème persiste, il est possible de réinitialiser la source d'alimentation pour vêtements chauffants tout en enfonçant la touche d'alimentation durant 10 secondes. Si, après toutes ces tentatives, le voyant ne s'allume toujours pas ou un échec se passe, contacter un centre de service de MILWAUKEE.

### Transport

L'application des réglementations concernant le transport de piles au lithium-ion dépendent de si la pile est transportée dans un véhicule privé, ou bien si elle est livrée par une société de transport. Toujours livrer les piles au lithium-ion selon les réglementations actuelles régissant le mode de transport choisi (par exemple, terrestre, aérien, maritime). En cas de doute, veuillez contacter MILWAUKEE, la société de transport ou d'autres professionnels qualifiés dans le transport de marchandises dangereuses afin de déterminer quelles sont les réglementations correspondantes.

Le transport privé des piles au lithium-ion est permis s'il suit ces instructions et avertissements. Lors du transport des piles au lithium-ion par une société de transport, elles sont livrées selon la classification UN 3480 (pile uniquement) ou UN 3481 (piles contenues ou emballées avec une pièce d'équipement). Les conditions en matière d'emballage, d'étiquetage, de marquage et de documentation dépendent généralement de si les piles en question ont une classification supérieure ou inférieure à 100 Wh. Les piles au lithium-ion dont la classification est de 100 Wh ou inférieure sont souvent « exemptes » de certaines réglementations de transport. Aux États-Unis, les produits livrés par transport terrestre pourront être « exempts » de certaines réglementations de transport de marchandises dangereuses si leur puissance électrique est de moins de 300 Wh.

### Entretien

**⚠️AVERTISSEMENT** Afin de minimiser le risque d'incendie, de blessures corporelles et de dommages au produit, ne pas laisser des liquides entrer dans le bloc-piles. Les liquides corrosifs et conducteurs, tels que l'eau de mer, quelques produits chimiques industriels et des solutions d'eau de Javel ou d'autres produits ayant de l'hypochlorite, etc., pourront causer des courts-circuits. Ne pas utiliser des blocs-piles qui ont été exposés à ce type de liquides. Toujours déconnecter le bloc-piles pour vêtements chauffants lorsqu'il n'est pas utilisé et avant d'effectuer toute tâche de nettoyage ou d'entretien. Ne pas désarmer ou tenter de réparer le bloc-piles pour vêtements chauffants. Pour TOUTES réparation, contacter un contre de service de MILWAUKEE.

### Entretien et rangement

Ne pas exposer le bloc-piles pour vêtements chauffants, l'outil ou les vêtements chauffants à l'eau, à la pluie, à l'humidité et ne pas les mouiller. Ceci peut endommager le bloc-piles pour vêtements chauffants, l'outil et les vêtements chauffants. Ne pas utiliser d'huile ou de solvants pour nettoyer ou lubrifier le bloc-piles. La boîte en plastique deviendra fragile et subira des fissures, ce qui entraînera un risque de blessures. Ranger votre bloc-piles pour vêtements chauffants dans un endroit frais et sec. Charger et déconnecter le bloc-piles pour vêtements chauffants avant de le ranger. Retirer des vêtements chauffants lorsqu'il n'est pas utilisé. Ranger les blocs-piles à température ambiante et loin de l'humidité. Ranger les blocs-piles à plat. Ne pas les ranger dans des endroits humides où la corrosion des bornes peut survenir. Comme pour les autres types de blocs-piles, la perte permanente de capacité pourra se passer si le bloc-piles est rangé, pendant de longues périodes, à températures élevées (supérieures à 120 °F / 50 °C). Recharger le bloc-piles comme d'habitude après l'avoir rangé environ un an.

### Réparations

Le bloc-piles pour vêtements chauffants ne comporte aucune pièce réparable. Retourner le bloc-piles pour vêtements chauffants au centre de service agréé le plus proche pour le faire réparer.

**⚠️AVERTISSEMENT** Afin de minimiser le risque de blessures ou d'explosion, ne jamais brûler ou incinérer un bloc-piles même s'il est endommagé, mort, ou épuisé. S'il est brûlé, il produira des fumées et des matériaux toxiques.

**Mise au rebut des blocs-piles au lithium-ion de MILWAUKEE** Les blocs-piles au lithium-ion de MILWAUKEE sont plus respectueux de l'environnement que d'autres types de blocs-piles (par exemple, ceux au nickel-cadmium). Toujours se débarrasser des blocs-piles selon les réglementations fédérales, provinciales et locales. Contacter une agence de recyclage locale pour connaître les lieux de recyclage. Les batteries déchargées contiennent du courant résiduel. Avant de mettre une batterie au rebut, couvrir les bornes de la batterie avec du ruban isolant afin d'empêcher un court-circuit pouvant causer un incendie ou une explosion.

### Sceaux de recyclage pour pile RBRC

Les opicules de recyclage des batteries RBRC™ (consulter la section « Symbologie » trouvées sur les blocs-piles vous indiqueront dont MILWAUKEE s'est arrangé avec la Rechargeable Battery Recycling Corporation (RBRC) pour leur recyclage. Une fois votre bloc-piles aura atteint la fin de sa vie utile, il faudra le retourner à un centre de service/une succursale de MILWAUKEE, ou bien à un centre détaillant participant. Pour de plus amples renseignements, veuillez consulter le site web de la RBRC à l'adresse www.rbrc.org.

### Accessoires

**⚠️AVERTISSEMENT** L'utilisation d'autres accessoires que ceux qui sont spécifiquement recommandés pour cet outil peut comporter des risques.

Pour une liste complète des accessoires, visiter le site internet www.milwaukeeetool.com ou contactez un distributeur.

| GARANTIE LIMITÉE - AUX ÉTATS-UNIS ET AU CANADA |  |

Tout bloc-piles MILWAUKEE (vendu avec un produit sans fil et/ou en tant qu'un bloc-piles de rechange) est garanti à l'acheteur d'origine par un distributeur agréé MILWAUKEE d'être exempté uniquement de vice de matériau et de fabrication. Sous réserve de certaines exceptions, MILWAUKEE réparera ou remplacera un bloc-piles qui, après examen, sera confirmé par MILWAUKEE d'être affecté d'un vice du matériau ou de fabrication pendant la période de garantie mentionnée après la date d'achat. Retourner le bloc-piles à un centre de service en usine MILWAUKEE ou à un poste d'entretien agréé MILWAUKEE, en port prépayé et assuré. Pour en savoir plus sur le processus de livraison du bloc-piles, veuillez composer le 1 (800.729.3878) ou visiter le site www.milwaukeeetool.com. Une copie de la preuve d'achat doit être présentée lors du retour du produit. Cette garantie ne couvre pas les dommages que MILWAUKEE détermine d'être causés par des réparations ou des tentatives de réparation par quiconque d'autre que le personnel agréé par MILWAUKEE, des utilisations incorrectes, des altérations, des utilisations abusives, une usure normale, une carence d'entretien ou des accidents.

| Bloc-piles No de Cat.                                                                                                                                                                                                                                                                                                                                                     | Composition chimique                                              | Période de la garantie (à compter de la date d'achat)                    |

\*La durée de la garantie des produits MILWAUKEE M18™ 48-11-1828 (ayant le préfixe d'identification « B41D » et leurs précédents), V18™ 48-11-1830 (ayant le préfixe d'identification « A95 ») et V28™ 48-11-2830 (ayant le préfixe d'identification « A71 ») est de cinq (5) ans / 2 000 charges comptés à partir de la date d'achat, selon la première éventuelle. La V18™ 48-11-1830 couvre les 1 000 premières charges, ou bien les 2 premières années de la garantie, selon la première échéance, ce qui comprend une batterie de rechange pour la batterie défectueuse. Cela veut dire que pour les 1 000 premières charges ou les deux (2) premières années à partir de la date d'achat ou la première charge, le cas échéant, le client recevra une batterie de rechange gratuite de MILWAUKEE. Par la suite, la garantie couvrira les charges restantes, jusqu'à un total de 2 000 ou les années restantes de la période de cinq (5) ans comptés à partir de la date d'achat, selon la première éventuelle, au prorata. Ceci veut dire que chaque client jouira d'un bénéfice de 1 000 charges ou trois (3) ans supplémentaires d'une garantie proportionnelle couvrant ces blocs-piles, d'après l'utilisation. MILWAUKEE ne devra pas être le produit en aucun cas. MILWAUKEE NE SAURAIT ÊTRE RESPONSABLE DE TOUT DOMMAGE ACCESSOIRE, SPECIAL OU INDIRECT, DE DOMMAGES-INTÉRÊTS PUNITIFS OU DE TOUTE DEPENSE, D'HONORAIRES D'AVOCATS, DE FRAIS, DE PERTE OU DE DELAIS ACCESSOIRES À TOUT DOMMAGE, DÉFAILLANCE OU DÉFAUT DE TOUT PRODUIT, Y COMPRIS NOTAMMENT LES PERTES DE PROFIT. CERTAINS ÉTATS ET PROVINCES NE PERMETTANT L'EXCLUSION OU LA LIMITATION DES DOMMAGES DIRECTS OU INDIRECTS, LES RESTRICTIONS CI-DESSOUS PEUVENT NE PAS ÊTRE APPLICABLES. CETTE GARANTIE EST EXCLUSIVE ET REMPLACE TOUTE AUTRE GARANTIE EXPRESSE, QUELLE SOIT VERBALE OU ÉCRITE. DANS LES MESURES PERMISES PAR LA LOI, MILWAUKEE RENONCE À TOUTE GARANTIE IMPLICITE, Y COMPRIS SANS S'Y LIMITER, TOUTE GARANTIE IMPLICITE DE COMMERCIALISABLE OU D'ADAPTATION À UNE UTILISATION OU À UNE FIN PARTICULIÈRE. DANS LA MESURE OU UNE TELLE STIPULATION D'EXONÉRATION N'EST PAS PERMISE PAR LA LOI, LA DURÉE DE CES GARANTIES IMPLICITES EST LIMITÉE À LA PÉRIODE LA PLUS COURTE APPLICABLE DE LA GARANTIE EXPRESSE. TELLE QUE CELA EST DÉCRIT PRÉCÉDEMMENT. CERTAINES PROVINCES NE PERMETTANT PAS DE LIMITATION DE DURÉE DES GARANTIES IMPLICITES, LES RESTRICTIONS CI-DESSUS PEUVENT NE PAS ÊTRE APPLICABLES. LA PRÉSENTE CONFÈRE À L'UTILISATEUR DES DROITS LÉGAUX PARTICULIERS. IL BÉNÉFICIE ÉGALEMENT D'AUTRES DROITS QUI VARIENT D'UNE PROVINCE À L'AUTRE.

\*Cette garantie s'applique uniquement aux produits vendus aux États-Unis et au Canada. Veuillez consulter l'onglet « Trouver un centre de service » dans la section « Pièces et service » du site web de MILWAUKEE à l'adresse www.milwaukeeetool.com, ou composer le 1.800.SAUSDUST (1.800.729.3878) afin de trouver le centre de service de le plus proche pour l'entretien, sous garantie ou non, d'un bloc-piles MILWAUKEE.

| REGLAS GENERALES DE SEGURIDAD                                                                                                                                                                                                                                                                                                                                                         |

| GUARDE LAS INSTRUCCIONES                                                                                                                                                                                                                                                                                                                                                              |
| <b>⚠️ADVERTENCIA</b> <b>LEA Y CONSERVE TODAS LAS INSTRUCCIONES.</b> Si no sigue todas las advertencias e instrucciones, se pueden provocar una descarga eléctrica, un incendio o lesiones graves.                                                                                                                                                                                     |
| <b>1. GUARDE ESTAS INSTRUCCIONES:</b> Este manual incluye información importante de seguridad e instrucciones de operación para la batería para prendas calefactadas de MILWAUKEE.                                                                                                                                                                                                    |
| <b>2. Únicamente conecte las prendas calefactadas compatibles de MILWAUKEE a los puertos de conexión de prendas calefactadas de la batería para prendas calefactadas. No use prendas calefactadas ni productos falsificados, falsos o "de imitación". Otros tipos de baterías podrían explotar. No conecte una batería a un conector de una fuente de energía ni a un encendedor.</b> |
| <b>3. Mantenga las baterías fuera del alcance de los niños.</b>                                                                                                                                                                                                                                                                                                                       |
| <b>4. Antes de usar la batería para prendas calefactadas, lea todos los manuales y todas las etiquetas de la batería para prendas calefactadas, los de las prendas calefactadas y los del dispositivo.</b>                                                                                                                                                                            |

- Use únicamente con una fuente de poder certificada/aprobada.
- Evite ambientes peligrosos.** No exponga ni cargue el producto bajo la lluvia, la nieve o en lugares mojados o húmedos. No use la batería ni el cargador en la presencia de atmósferas explosivas (gases, polvo o materiales inflamables). Podrán producirse chispas al momento de insertar o quitar la batería, lo que podría ocasionar un incendio.
- Cárguese únicamente en un área bien ventilada y dentro del rango de temperatura ambiente de carga recomendada.** No obstruya las ventilas; manténgalas despejadas para que se cuente con una buena ventilación. No permita que haya humo o llamas vivas cerca de la batería que se esté cargando. Los gases ventilados pueden explotar.
- Dar mantenimiento al cable.** Jale del enchufe en vez del cable. Nunca transporte el cargador sujetándolo del cable. Proteja el cable del calor, aceite y bordes filosos. Asegúrese de que el cable no se pise, se tropiecen con él, se dañe o se mantenga tensado. No use el cargador con el cable o enchufe dañado. Cambie de inmediato el cable dañado.
- Use únicamente los accesorios recomendados.**
- Desconéctelo cuando no esté usándolo y antes de limpiarlo o darle mantenimiento.** No permita que el agua fluya dentro del enchufe CA/CD. Use un interruptor de circuito por pérdida a tierra (GFCI) para reducir los riesgos de una descarga eléctrica.
- No queme, incinere ni exponga las baterías al fuego ni a temperaturas excesivas que sobrepasen 130°C (265°F).** Las baterías pueden explotar. Los humos y materiales tóxicos se crean cuando se queman las baterías.
- No aplaste, deje caer, pele, modifique o dañe la batería. Siempre ponga las baterías en un contenedor seguro durante la transportación.** No utilice una batería que haya recibido un golpe seco, se haya caído, se haya aplastado o dañado de algún modo (por ejemplo, perforado con un clavo, golpeado con un martillo, se haya pisado durante un accidente vehicular). No use ni cargue baterías que parezcan estar dañadas o infladas o que no funcionen bien. Las baterías dañadas o modificadas podrán presentar un comportamiento impredecible.
- No desarme ni intente reparar las baterías o cargadores.** No cuenta con ninguna pieza reparable. Lleve las baterías/cargadores que se hayan dañado, roto o necesiten reparación a un centro de servicio de MILWAUKEE para garantizar que se mantenga la seguridad del producto.
- Los químicos de la batería causan quemaduras graves.** Nunca permita el contacto con la piel, ojos o boca. Si una batería dañada derrama químicos, use guantes de goma o neopreno para desecharla. Si la piel es expuesta a los fluidos de la batería, lave con agua y jabón, y enjuague con vinagre. Si los ojos son expuestos a los químicos de la batería, enjuague inmediatamente con agua durante 20 minutos y busque atención médica.
- No provoque un corto circuito.** Una batería con corto circuito podrá provocar un incendio, lesiones físicas y daños en el producto. Una batería sufrirá un corto circuito si un objeto metálico crea una conexión entre los contactos positivo y negativo en la batería. No ponga una batería cerca de nada que podría ocasionar un cortocircuito (por ejemplo, monedas, llaves, clavos o pequeños objetos metálicos en el bolsillo, la caja de herramientas o el cajón).
- No permite que entre fluidos en la batería.** Los fluidos corrosivos o conductivos, como es el caso del agua de mar, ciertos químicos de nivel industrial, el cloro o productos con peróxido de hidrógeno, etc., Podrán provocar un corto circuito. No use las baterías que hayan estado expuestas a este tipo de líquidos.
- Desconecte la batería para prendas calefactadas de la prenda calefactada compatible de MILWAUKEE antes de guardarla.** Tales medidas preventivas disminuyen el riesgo de activación involuntaria de los dispositivos.
- Antes de lavar las prendas calefactadas, siempre desconecte la batería para prendas calefactadas y quítela.**
- Guarde la batería en un lugar fresco y seco.** No se guarde donde la temperatura pudiera ser mayor que 50 °C (120 °F) tal como directamente bajo la luz del sol, un vehículo o estructura de metal durante el verano.
- Siempre envíe las baterías de ion de litio según lo indicado en las normas actuales que rigen el modo de transporte elegido (por ejemplo, terrestre, aéreo, marítimo).** En caso de tener alguna duda, comuníquese con MILWAUKEE, el transportista o con otro profesional capacitado en el transporte de mercancía peligrosa para definir cuáles son las normas correspondientes.
- Conservé las etiquetas y las placas en buen estado.** En ellas se muestra información importante. Si son ilegibles o no están presentes, comuníquese con un centro de servicio de MILWAUKEE para recibir un reemplazo.

### FCC Federal Communications Commission

De conformidad con la sección 15.21 del Reglamento de la FCC, queda usted prevenido de que cualquier cambio o modificación que no esté expresamente aprobado por la parte responsable de cumplimiento podría anular su derecho de operar el producto.

Este equipo ha sido probado y se ha encontrado que cumple con los límites de un dispositivo digital de Clase B, en cumplimiento con la parte 15 del reglamento de la FCC. Estos límites están diseñados para proporcionar protección razonable contra la interferencia nociva en una instalación residencial. Este equipo genera, usa y puede irradiar energía de radiofrecuencia y, si no se instala y se usa de acuerdo con las instrucciones, puede ocasionar interferencia nociva en las comunicaciones por radio. Sin embargo, no existe garantía de que no ocurrirá interferencia en una instalación en particular. Si este equipo ocasiona interferencia nociva con la recepción de radio o televisión que pueda determinarse encendiendo y apagando el equipo, se invita al usuario a que intente corregir la interferencia mediante una o más de las siguientes medidas:

- Reorientar o reubicar la antena receptora.
- Aumentar la distancia entre el equipo y el receptor.
- Conecte el equipo a un tomacorriente que esté en un circuito diferente al que está conectado el receptor.
- Consultar al distribuidor o a un técnico calificado de radio/TV para solicitar ayuda.

Este dispositivo cumple con lo dispuesto en la sección 15 del Reglamento de la FCC así como las normas RSS de exención de licencia de ISED-Canada. El funcionamiento está sujeto a las siguientes dos condiciones: 1) Este dispositivo no debe ocasionar interferencia nociva y 2) este dispositivo debe admitir toda interferencia entrante, incluida aquella que podría ocasionar un funcionamiento no deseado.

### Declaración de exposición a la radiación FCC y IC:

Este equipamiento cumple con los límites de exposición a radiación canadienses y de la FCC establecidos para un ambiente no controlado. Este transmisor no debe ponerse ni usarse en combinación con alguna otra antena o transmisor.

### Especificaciones

**⚠️ADVERTENCIA** Únicamente conecte las prendas calefactadas compatibles de MILWAUKEE a los puertos de conexión de prendas calefactadas de la batería para prendas calefactadas. No use prendas calefactadas ni productos falsificados, falsos o "de imitación". Otros tipos de baterías podrían explotar. No conecte una batería a un conector de una fuente de energía ni a un encendedor.

**Antes de lavar las prendas calefactadas, siempre desconecte la batería para guantes calefactados y quítela.**

### Use con prendas calefactadas compatibles

Inserte el cable de energía (desde la parte de adentro del bolsillo del portabaterías en la prenda calefactada compatible) en los puertos de conexión de prendas calefactadas que están en la batería para prendas calefactadas de MILWAUKEE.

Ponga la batería para prendas calefactadas dentro del bolsillo y ciérrela.

Para quitar la batería, abra el bolsillo y desconecte la batería.

### Acoplamiento por Bluetooth

Para emparejar, mantenga oprimido el botón de encendido durante dos segundos. El indicador Bluetooth parpadeará. Cuando esté conectado correctamente a un dispositivo, el indicador Bluetooth se encenderá de manera fija y se apagará. Si el emparejamiento falla, el indicador Bluetooth parpadeará y se apagará. Para **desemparejar**, use el dispositivo emparejado para desconectarlo o mantenga oprimido el botón de encendido durante cuatro segundos. El indicador Bluetooth parpadeará y se apagará.

### Indicador de carga

Inserte o retire los puertos del conector del paquete de baterías para mostrar la energía restante del paquete de baterías. El indicador de carga no se encenderá cuando la batería ya no tenga energía.

|                               |         |
|-------------------------------|---------|
| Luz LED 1 parpadeante/sin luz | 0-9%    |
| Luz LED 1 fija                | 10-25%  |
| Luces LED 1 a 2 fijas         | 26-50%  |
| Luzes LED 1 a 3 fijas         | 51-75%  |
| Luzes LED 1 a 4 fijas         | 76-100% |

### Cuándo debe cargar batería para guantes calefactados

Las baterías de MILWAUKEE no desarrollan una "memoria" cuando se cargan después de una descarga parcial. No es necesario agotar la energía de la batería para guantes calefactados antes de cargarla.

- Use el indicador de carga para definir el momento en que debe cargarse.
- Puede cargar completamente la batería para guantes calefactados antes de usarla.
- El único momento en que será necesario cargar la batería para guantes calefactados es cuando se haya agotado su energía o antes de almacenarla. Cárguela conforme sea necesario.

### Carga de la batería para prendas calefactadas

- Conecte su cable USB-C a una fuente de energía, como un adaptador de pared de CA, una computadora o un puerto de un automóvil.
- Inserte el otro extremo del cable USB-C en el puerto USB-C de la batería para prendas calefactadas.
- La luz del indicador de carga mostrará el estatus de carga:
  - El tiempo de carga depende de la capacidad de la batería. Las baterías que se hayan usado demasiado podrán tardar más tiempo en cargarse por completo.
  - Si los indicadores electroluminiscentes no se encienden o si las luces 1 y 3 / 2 y 4 parpadearán alternadamente, lo que querrá decir que ocurrió un error. Revise que el cable de carga esté conectado correctamente. Si los indicadores electroluminiscentes siguen sin encenderse, desconecte el cable de carga durante al menos 2 minutos. Después de 2 minutos, vuelva a conectar el cable de carga. Si el problema persiste, es posible reiniciar la fuente de poder de prendas calefactadas manteniendo oprimido el botón de encendido durante 10 segundos. Si el indicador electroluminiscente sigue sin encender o muestra un error aun después de estos intentos, comuníquese con un centro de servicio de MILWAUKEE.

### Transporte

El reglamento en materia de transporte de baterías de ion de litio es distinto dependiendo de si la batería se transporta en un vehículo de uso personal o si se envía con un transportista comercial. Siempre envíe las baterías de ion de litio según lo indicado en las normas actuales que rigen el modo de transporte elegido (por ejemplo, terrestre, aéreo, marítimo). En caso de tener alguna duda, comuníquese con MILWAUKEE, el transportista o con otro profesional capacitado en el transporte de mercancía peligrosa para definir cuáles son las normas correspondientes.

El transporte personal de las baterías de ion de litio está permitido siempre y cuando se realice conforme a estas advertencias e instrucciones. Al enviar baterías de ion de litio con un transportista comercial, se envían conforme a lo indicado en la clasificación UN 3480 (batería sola) o UN 3481 (baterías contenidas o empacadas con equipamiento). Las exigencias correspondientes al embalaje, el etiquetado, el marcado y la documentación suelen depender de si las baterías en cuestión tienen una potencia nominal mayor o menor a 100 Wh. En ocasiones, las baterías de ion de litio con una potencia nominal de 100 Wh o menor suelen estar "exentas" en cuanto al cumplimiento de ciertas normas de envío. En EE. UU., los productos enviados por transporte terrestre pueden estar "exentos" de cumplir con ciertas normas de envío de materiales peligrosos si su potencia es menor a 300 Wh.

### Mantenimiento

**⚠️ADVERTENCIA** Para reducir el riesgo de incendio, lesión física y daños de producto, no deje que ningún líquido entre en la batería. Los líquidos corrosivos o conductivos, como es el caso del agua de mar, ciertos químicos industriales y el cloro o los productos de cloro, etc., podrán causar un cortocircuito. No use las baterías que hayan estado expuestas a este tipo de líquidos.

**Siempre desconecte la batería para prendas calefactadas cuando no se esté usando y antes de realizar alguna labor de limpieza o mantenimiento. No desarme ni intente reparar la batería para prendas calefactadas usted mismo. Comuníquese con un centro de servicio de MILWAUKEE en relación con TODAS las reparaciones.**

### Mantenimiento y almacenamiento

No exponga la batería para prendas calefactadas, la herramienta ni la prenda calefactada al agua, la lluvia la humedad ni deje que se mojen. Lo anterior podría dañar la batería para prendas calefactadas, la herramienta y la prenda calefactada. No use aceite o solventes para limpiar o lubricar la batería. La carcasa de plástico se volverá frágil y se romperá, lo que provocará un riesgo de lesión.

Guarde su batería para prendas calefactadas en un lugar fresco y seco. Cargue y desconecte la batería para prendas calefactadas de la prenda calefactada antes de guardarla. Quítela de las prendas calefactadas cuando no se esté usando. Guarde las baterías a temperatura ambiente, alejadas de la humedad. **Guarde las baterías horizontalmente.**

No se guarde en lugares húmedos donde pueda ocurrir la corrosión de las terminales. Al igual que otros tipos de baterías, puede ocurrir una pérdida permanente de capacidad si la batería se guarda mucho tiempo a altas temperaturas (más de 120 °F / 50 °C). Después de un año de almacenamiento, cargue la batería como siempre.

### Reparaciones

La batería para prendas calefactadas no cuenta con ninguna pieza reparable. Devuelva la batería para prendas calefactadas al centro de servicio autorizado más cercano para que la reparen.

**⚠️ADVERTENCIA** Para reducir el riesgo de lesiones o explosión, nunca queme ni incinera una batería incluso si está dañada, muerta o completamente descargada. Cuando se quema, se producen humos y materiales tóxicos.

### Desecho de baterías de iones de litio

Las baterías de iones de litio son menos dañinas para el medioambiente que otros tipos de baterías para herramientas eléctricas. Siempre deseche su batería siguiendo las normas federales, estatales y locales. Póngase en contacto con la agencia de reciclaje en su área para averiguar dónde se pueden reciclar. Incluso las baterías descargadas contienen algo de energía. Antes de desecharlas, use cinta aislante para cubrir los terminales e impedir que la batería haga un cortocircuito que pudiera causar un incendio o una explosión.

### Sellos de Reciclaje de Baterías RBRC

Los Sellos de Reciclaje de Baterías RBRC™ (véase "Simbología") en las baterías de su herramienta indican que MILWAUKEE ha hecho los arreglos pertinentes para reciclar dichas baterías con la Rechargeable Battery Recycling Corporation (Corporación de Reciclaje de Baterías Recargables, o RBRC por sus siglas en inglés). Al final de la vida útil de las baterías, devuelva éstas a la Oficina Principal/Centro de Servicio de MILWAUKEE o el distribuidor autorizado más cercano a usted. Si desea mayor información, visite el sitio web de RBRC en www.rbrc.org.

### Accesorios

**⚠️ADVERTENCIA** Utilice sólo los accesorios específicamente recomendados. Otros accesorios puede ser peligroso.

Para una lista completa de accesorios, visite nuestro sitio en Internet: www.milwaukeeetool.com o póngase en contacto con un distribuidor.

| GARANTÍA LIMITADA - E.U.A. Y CANADÁ                                                       |  |

Todas las baterías de MILWAUKEE (que se venden con productos inalámbricos y/o como baterías de repuesto) están garantizadas ante el comprador original por un distribuidor autorizado MILWAUKEE únicamente de que no tengan material y mano de obra defectuosos. Con algunas excepciones, MILWAUKEE reparará o cambiará una batería que tenga defectos de material o mano de obra, según lo determine MILWAUKEE mediante una revisión, durante la vigencia indicada a partir de la fecha de compra. Devuelva la batería a un centro de servicio de fábrica de MILWAUKEE o a una estación de servicio autorizada de MILWAUKEE, con el flete prepagado y asegurado. Para fines de un envío correcto de baterías, llame al 1.800.SAUSDUST (1.800.729.3878) o visite [www.milwaukeeetool.com](http://www.milwaukeeetool.com). Se debe incluir una copia del comprobante de compra con el producto devuelto. Esta garantía no aplica a daños que MILWAUKEE determine que son ocasionados por reparaciones o intentos de reparaciones realizados por una persona que no sea personal autorizado de MILWAUKEE, uso indebido, alteraciones, maltrato, desgaste normal, falta de mantenimiento o accidentes.
