Installing the battery

Replace the batteries in power off states

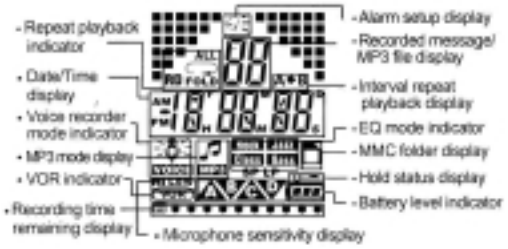
1. insert AAA(LR03) battery with symbols aligned correctly and then slide the cover back into place.

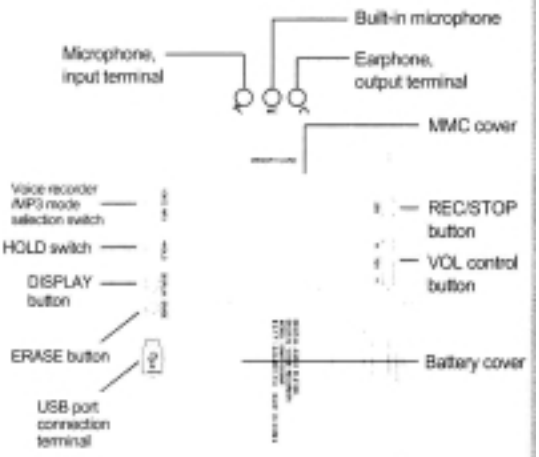
※ Caution

1. Battery life time can be change according to operating method.
2. Take the battery off when you do not USB for a long time.

Checking the battery level

Name of the each part





Turning on the voice recorder/MP3 mode

Your unit consists of voice recorder and MP3 modes.
To start, select the mode you wish to use.

To turn on the voice recorder mode

1. Set the voice recorder/MP3 mode selection switch to VOICE.

2. A recording folder, recording message number, recording time, etc. are displayed and you may record and playback the voice recording. Press the JOG button.

To turn on the MP3 mode

1. Set the voice recorder/MP3 mode selection switch to MP3. Press the JOG button.

2. The MP3 file number and playback time are displayed and you can playback MP3 files.

If the unit is switched on and left idle for more than 1 minute in voice recorder/MP3 mode, it will automatically return to standby mode. The current time will be displayed in this mode.

Adjusting the volume

The volume may be adjusted from levels 0 to 22.

To increase the volume

Press the side of the volume button.
As you press the button, the VOL number increases along with the volume level.

To decrease the volume

Press the side of the volume button.
As you press the button, the VOL number decreases along with the volume level.

You cannot adjust the volume while in standby mode where the LCD only displays the current time.
In this case, press the JOG button once to switch to voice recorder or MP3 mode and then adjust the volume.

Listening with earphones

You need to connect a set of earphones to your unit to listen to music in MP3 mode.
You can also listen to your recorded/playback messages on your earphones in voice recorder mode.
Insert the earphone jack into the output terminal.
You should hear sound through your earphones.

No sound is emitted through the speakers when you are in MP3 mode.

Recording

Turn the built-in microphone towards the sound source while recording.

With the voice recorder mode on

1. Press the JOG button in the direction to select the folder to record each push of the JOG button will allow you to select a folder from A ,B ,C ,D in this order. (A ,B ,C ,D, with a MMC installed.)
A folder can only be selected when you are in "STOP" mode.
Press the REC/STOP button.

2. A red signal lamp goes on and recording begins, a recording number is allocated and the recording time is displayed.

To stop recording

1. Press the REC/STOP button.
The red signal lamp goes off and the recording will have been stored.

To pause the recording

Press the JOG button in direction.
The red signal lamp will flash and recording is temporarily paused.To continue recording, press the JOG button once more in the direction.

You can listen to content being recorded through your earphones while recording. Refer to page 14 to set the microphone sensitivity. Refer to page 15 if you'd like to use the VOR function which sets unit to record only when there is sound.

Playing

With voice recorder mode on

1. Press the JOG button in the direction to select the folder from which to play back a file.
Each push of the JOG button in the direction will allow you to select a folder from A, B, C, D, in this order.
(A, B, C, D, with a MMC installed.)

2. Press the JOG button in the (or)direction to select the file number you wish to play.
3. Press the JOG button.
The playback time will be displayed and playback begins.

To stop playback

Push the JOG button.
Playback will stop.
To continue playback, press the JOG button again.

If you want to search for and play a specific section of a recording

Keep the JOG button pressed in the (or)direction while playing.
