Subject: FCC Class II Permissive change for FCC ID: P4M-DTW200D

Dear Examiner,

The purpose of this application is to request a Class II permissive change for FCC ID: P4M-DTW200D. The permissive change is to address RF exposure concerns when this modular transmitter is installed in the specific host device identified in this application. The host with module integrated was tested for EMC compliance and the composite device was found to not degrade the emissions characteristics of the module from its original class B compliance level.

If there are any questions or if further information is needed, please contact me for assistance.

Regards,

Jason Centers
Staff Engineer
