Declaration on Radiation safety Standard Conformance

FCT (Fixed Cellular Terminal)

We, Ericsson AB, hereby declares that FCT model.no. 0130101-BV and 0130102-BV are in compliance with the following harmonized european standard:

EN 50360:2001 – *Product standard to demonstrate the compliance of mobile phones with the basic restrictions related to human exposure to electromagnetic fields (300 MHz-3 GHz).*

Additional information:

SAR (Specific Absorption Rate) measurements are usually performed to meet EN 50360:2001 (EU market), for Ericsson products that are normally used at the ear.

As the FCT is not to be used close to the human body, as it is at least 20 cm apart from the telephone device, the physical SAR measurements are not applicable to the FCT. This estimation is done in cooperation with Notified Body (third party test facility).

Important notice:

The user and installation guides for the FCT states in the transmitter operating conditions that the FCT shall be placed at least 20 cm apart from the connected telephone device for satisfying the RF exposure compliance, which is a prerequisite for this SAR compliance declaration.
