Request to Dismiss Grant FCC ID P6FY

Date: April 16, 2014

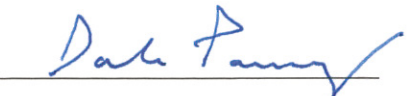

American Certification Body, Inc.
6731 Whittier Avenue
Suite C110
McLean, VA 22101

To Whom It May Concern:

On behalf of RF Code, Inc. (RFC), this letter is a formal request to dismiss the filing for FCC ID P6FY. The M180 Shrink Tag product was originally developed for a specific customer with a very specific business opportunity. During the product development cycle, this customer selected an alternative technology and ended its engagement with RFC. At that time, RFC shelved the project and cancelled the planned investment in tooling for the injection molded enclosure. The design for the production enclosure called for molding the FCC ID into the plastic part. Since this tooling was never developed, we are 100% confident that we have never produced or labelled any production-relevant devices in accordance with this grant. We certify that we have not sold or marketed any of the devices in the USA.

If any commercial interest emerges for this product, we may elect to re-file at some future date.

Thank you,

By:  Dale Parvey
