Hi Greg,

This is the response to your technical request already. Metrak ;12093

Could you write to him and answer his questions? And carbon me on it? Thanks.

Hi Marianne,

1. The gain of the antenna is 0dBi.

2. I have no idea what an emission designator is? So I surely can't justify

one :) Can someone explain this to me? Or send the section of rules to read?

Sorry, but this is our first phone for the US and I am not very familiar with FCC rules.

Thanks,

Joe Murphy

Hello Mr. Murphy,

Greg Czumak, our reviewer, has completed the Part 24 review. Below are some issues he needs to have satisfied. Please send to me and I will forward.
Thanks.

1. Please provide information on the EUT antenna gain. Because the EIRP of the EUT must be listed on the grant, this information is required.
2. Please propose an emission designator for the EUT, and justify your choice. (It should be 320KGXW)
