Safe use of your new phone

Please observe the following guidelines for safe and responsible operation of your cellular phone

Follow all guidelines for safe and legal use of your phone. See detailed information in this manual.

Use caution while placing or receiving calls while driving. You should try to find a safe place to pull over and stop driving before placing or receiving a phone call while driving. The use of a hands free headset is required for cell phone use while driving in some areas.

Keep your phone switched off near blasting areas where explosives are being detonated. Always observe local rules and regulations that may restrict or prohibit phone use in some areas.

When in hospitals or near medical equipment local rules and regulations may require that your phone be switched off.

FCC regulations require that your phone be switched off while on airplanes. Wireless phones could cause interference with the airplanes equipment or air traffic control signals.

Keep your phone switched off while refueling. Do not use your phone while near fuel or flammable chemicals.

Avoid contact with your phones antenna while the phone is in use.

All wireless phones, including this one may receive interference from other sources, which may affect the phones performance.

Getting Started

UnPacking

Carefully unpack and inspect the contents of your new phone's box.

Contents

Your new phone's box should contain the following items:

Phone
Battery
Charger
User Manual
Neck Strap
Hands Free Kit

Installing your SIM Card

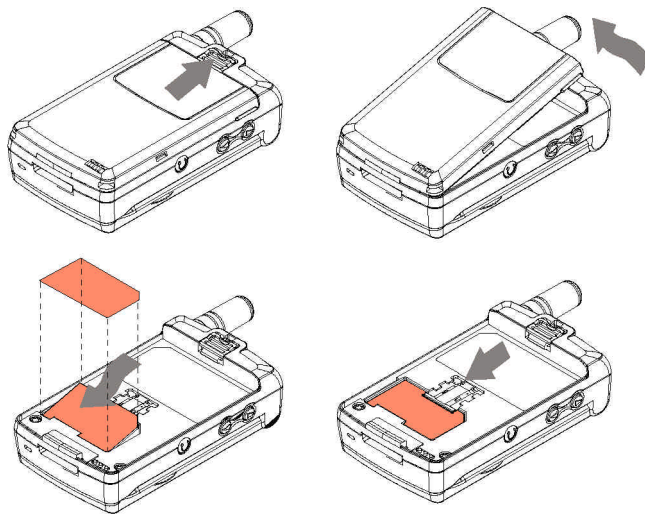

Depending upon how you purchased your Mobicom phone, it may or may not have come with a SIM card already installed. The SIM card acts as the heart of the phone, providing the ability to store both your phone's own number as well as those numbers that you frequently dial.

If the SIM card is not installed, please follow these instructions::

1. Remove the battery from the back of the phone.
2. Slide the SIM card into the slot, with the electrical contacts facing inward.
3. Move the latch downward to hold the SIM card in place.
4. Put the battery back into position.

Warning: The SIM card is a delicate piece of precision electronic hardware; care should be taken while handling it to prevent damage. Avoid excessive or unnecessary handling of the SIM card. Never touch the golden electrical contacts on the SIM card with fingers or other objects. Never bend the SIM card. Never force the SIM card into its connector; when properly aligned the card should slide in effortlessly

Installing SIM card In new Phone.

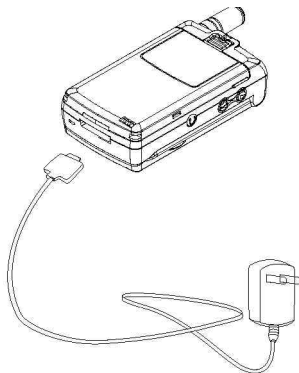

Charging your phone's battery

To ensure proper operation, your new phone's battery should be fully charged prior to its first use. Charge the battery by using the enclosed MobiCom AC wall charger or the MobiCom mobile charger. It may take up to three hours to fully charge your phone's battery.

Gently align and insert the charger into the phone by pressing the release buttons on the side of the charger... place the , until you hear it click into place.

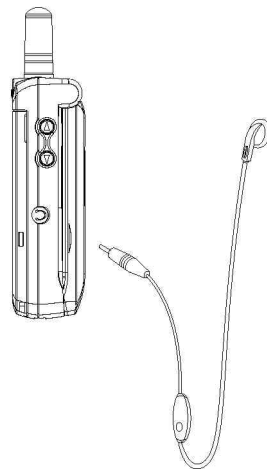

.Gently connect charger to Phone.

Making and Recieving Phone Calls

Dial By Number

Using the phone's key pad, enter the number you wish to call. When you have finished entering the phone number, press the (green phone) key to place the call.

If you want to dial a number that is already stored in your Phone Book (see Storing Phone Numbers, pg. xxx) use the scroll up and down keys to locate the phone book entry you wish to dial. Press the (green phone) key to place the call.

Dial By Name

Using the scroll keys, highlight the Phone Book icon from the main menu of features. Press the select key. Scroll to the SEARCH NAME function, and press the select key. Using the phone's keypad, enter the name of the contact you wish to call. Press the search key when finished. The name and number will appear on the screen. Press the (green phone) key to place the call.

If you want to dial a name that is already stored in your Phone Book (see Storing Phone Numbers, pg. xxx) use the scroll up and down keys to locate the name of the person you want to call. Press the (green phone) key to place the call.

Receive Calls

There are several ways to answer incoming calls:

Flip Open Answer:

This allows you to answer a phone call simply by flipping open the phone. To enable this function, scroll to the FLIP OPEN ANS function and press the select key. To enable the flip open answer function, Press the ON key. To disable the flip open answer function, press the OFF key.

If “flip open answer” has been deactivated (see Call Settings pg XXX) press the XXX key to answer the call.

Any Key Answer

This allows you to answer a phone call simply by pressing any key on the phone. To enable this function, scroll to the ANY KEY ANSW function and press the select key. To enable the any key answer function, Press the ON key. To disable the any key answer function, press the OFF key.

If any key answer has been deactivated (see Call Settings pg XXX) press the xxx key to answer the call.

Audio Settings

We're all unique. From classical to traditional to contemporary to whimsical, your (Mobicom phone model) offers a variety of ringer options and tone settings to fit every personality and preference.

Audio Settings

This directory offers you a variety of different menu options to set audio volume and tones. To access the audio setting options, press the ____ Menu key and select the ____ Audio Settings icon from the main menu of features. Press the __ Exit key to return to the main menu of features.

Setting volume

To set volume levels, scroll to the SET Vol function and press the select key.

Setting Speech Volume

To set the speech volume, scroll to the SPEECH VOL. function and press the select key. Adjust the volume up or down using the right and left scroll keys.

Setting Ringer Volume

To set Ringer Volume, scroll to the RINGER VOL. function and press the select key. Adjust the volume up or down using the right and left scroll keys.

Setting Tone Volume

To set the Tone Volume, scroll to the Tone Volume function and press the select key. Adjust the volume up or down using the right and left scroll keys.

Setting a Ringer Type

To adjust the ringer type and tone, scroll to the ringer/vib function and press the select key.

To adjust the ringer tone, scroll to the Ringer Tone function and press the select key. Using the scroll down key, select from the following ring tones:

- Blip
- Simple 1
- Submarine
- Chirp
- Bring
- Walking Bass
- Nee Naw
- Wild Rover
- Town I Love
- Connemara
- Wild Mountain
- Chopin
- Bach

- Blue Bonube
- Maple
- Scherzo
- Simple 2
- Sleeping
- Phone Ring 1
- Phone Ring 2
- Phone Ring 3
- Phone Ring 4
- Two Tone

Tones will automatically sound as they are highlighted.

To specify a combination of ringer and vibration options, scroll to the Ringer/Vib function and press the select key. You will then have the ability to choose from the following choices:

- Ring Only
- Vibration Only
- Ring / Vib
- Vib / Ring
- Silent

Use the scroll down key to move between the various selections. Press the select key to choose an option.

Setting Tone Types

You can set tones for a variety of different functions. To set tones, scroll to the SET TONE function and press the select key.

Setting Key Tones

To set various key tones, scroll to the KEY TONE function and press the select key. You have 3 different key tones to choose from:

- Key Click Tone
- DTMF Tone
- Silent

Use the scroll down key to move between the various selections. Press the select key to choose an option.

Setting Info Tones:

To set an Info tone, scroll to the INFO TONE function and press the select key. To turn the info tone on, press the ON key. To turn the Info tone off, press the OFF key.

Setting the SMS Rx. Tone

To set a tone to indicate the arrival of a text message, scroll to the SMS Rx. Tone function and press the select key. You will have several different key tones to choose from:

- Silent
- Beep Once
- Meeting
- Standard
- Outdoor
- Vibration

Use the scroll down key to move between the various selections. Press the select key to choose an option.

Setting the Serve Tone:

To set a Serve tone, scroll to the SERV. TONE function and press the select key. To turn the serv. tone on, press the ON key. To turn the serv. tone off, press the OFF key.

Setting One Min Beep Tone

Your phone can be programmed to emit a short beep every minute to help you track how long you have been connected.

To set an One Minute Beep tone, scroll to the 1 Min Beep function and press the select key. To turn the One Minute Beep tone on, press the ON key. To turn the One Minute Beep tone off, press the OFF key.

Phone Book

Your new phone is equipped with plenty of internal memory and has the capacity to store up to 200 names and phone numbers. However, if you move your SIM Card frequently between multiple GSM phones, you may want to save some names and phone numbers on the SIM card for ease of use. Names and phone numbers saved on your SIM Card will be available on any GSM phone you install the SIM Card in; however, please note that the SIM Card does have limited capacity, so you may want to store only your most important or frequently accessed names and phone numbers on it.

This directory offers you a variety of different menu options to manage and access important contact information. To access your phone book options, press the ____ Menu key and select the ____ Phone Book icon from the main menu of features. Press the __ Exit key to return to the main menu of features.

Searching by name:

To search for a Name entry in your phone book, scroll to the SEARCH NAME function and press the select key. Using your phone's keypad, enter letters of the name you wish to find. When finished, press the VIEW key. To edit the entry, press the EDIT key. Press the -----scroll key to highlight the areas you want to edit. Press the ERASE key to remove letters and make the appropriate changes. When edits are complete, press the STORE key.

Creating an entry in the phone book:

To create a new entry in your phone book, scroll to the CREATE function and press the select key.

-Using your phone's keypad, enter the first and last name for the contact. When finished, press the OK key.

-Next, enter the phone number for the contact. Press the OK key to accept the entry. Press the ERASE key to edit your entry.

Deleting an entry in the phone book:

To delete an entry in your phone book, scroll to the DELETE function and press the select key.

-Using the scroll keys, find the phone book entry you would like to delete. When the entry is selected, press the DELETE key.

-Press YES if you would like to delete the entry. Press NO if you would not like to delete the entry. Press EXIT to return to the previous menu.

Copying a Phone book entry from the SIM card to the phone:

To copy a phone book entry from the SIM card to your phone, scroll to the COPY function and press the select key.

Using the scroll keys, find the phone book entry you wish to copy. When the entry is selected, press the COPY key. Press YES to copy the entry to the phone. Press NO to cancel this function. Press EXIT to return to the previous menu.

Viewing SIM card and Phone phone books:

To view the phone book directory on your SIM card or on your phone, scroll to the DIRECTORY function and press the select key.

To view the phone book directory for the SIM card, scroll to the SIM function and press the select key.

-To view the phone book directory for your phone, scroll to the LOCAL function and press the select key.

Checking available phone book memory space:

To determine how much phone book memory space your phone has, scroll to the FREE COUNT function and press the select key. You will be able to view:

-SIM: the TOTAL number of phone book entries that are currently stored on your SIM card and the amount of space that is still available for storing future entries

-LOCAL: the TOTAL number of phone book entries that are currently stored on your phone itself and the amount of space that is still available for storing future entries

Entering your phone's number into phone book:

To enter your phone's number into the phone book, scroll to the OWN NUMBER function and press the select key. Enter your phone's number and press the OK key. Press the ERASE key to make changes to the number.

One-Touch Dialing:

You can program one-touch dialing for up to 9 phone numbers. To set-up one touch dialing, scroll to the 1 TOUCH DIAL function and press the select key. Scroll to the Key 1 function and press select. Enter the phone number you would like to set 1 touch dialing for, and press the OK key. Press the Erase key to edit this entry. Repeat these steps for Keys 2-9. Press EXIT to return to the previous menu.

Storing a Phone Number in your SIM Card

Storing a Phone Number in your phones internal memory

Changing Phone Settings

Your new phone is factory configured to be a useful and productive tool. However, your phone is an extension of yourself and only you will know what works best for you. Your phone allows virtually every aspect of its operation to be custom configured to suit the way you live, work and play.

Mobicom Corporation

960 Holmdel Rd.

Holmdel, NJ 07733

USA

FCC Notice And SAR Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the unit off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

Any changes or modifications not expressly approved by Mobicom Corporation will void the user's authority to operate this equipment. Only use approved batteries and chargers.

Specific Absorption Rate (SAR) is a value that corresponds to the relative amount of RF energy absorbed by the user of a wireless phone. The Federal Communications Commission of the U.S. Government sets SAR limits. The maximum allowed SAR value of 1.6W/kg allows for a substantial safety margin, designed to assure the safety of all persons. Tests for SAR values are conducted using FCC approved operating positions at the highest possible power levels. The actual SAR level while using the phone is likely to be well below the maximum value.

Highest reported SAR levels for this phone are: Head 1.18 W/kg, body 0.244 W/kg. SAR compliance for body-worn operating configurations is limited to the specific belt-clips/holsters/accessories shipped with this product. SAR compliance is limited to the batteries shipped with this product.
