Antenna Datasheet

Name	Antenna Type	Peak Gain	Antenna Height
Ant 1	Integral PCB Trace Monopole	3.22 dBi	17.10 mm
Ant 2	Integral PCB Trace Monopole	4.00 dBi	4.75 mm

Antenna construction: Antennas 1 and 2 are integral PCB trace monopole antennas formed on the top copper layer of the PCBA. Antenna 1 uses a straight radiating trace, and Antenna 2 uses a folded radiating trace. Both antennas are positioned along the PCB edge within defined copper keep-out regions and are permanently connected to their respective RF feed circuits. The antennas are not user-replaceable.
