TEL: 886-2-8226-5088 FAX: 886-2-8226-5077

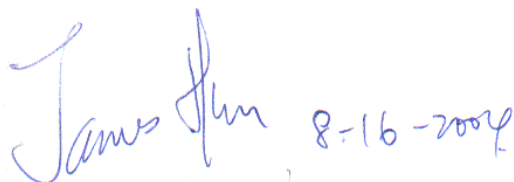

To Whom It May Concern:

Since the modifications of "copper tape" made do not appear to be a solution usable in production. Note that copper tape is considered by most to be a temporary fix, and the temporary fix will be implemented on existing devices.

Due to the nature of the modifications, We, CC&C Technologies, Inc., is in the process of determining a manufactureable modification for our device. Once an acceptable solution has been found, we will retest the unit for all radiated emissions and file a permissive change application for this device. In the mean time, we have requested that the current sample tested be certified.

Please note that the devices manufactured now will contain the 'copper tape' modifications, and will be incorporated into existing devices.

Sincerely yours,

James Hsu / VICE President R&D Division
CC&C Technologies, Inc.
