Federal Communications Commission (F.C.C) Statement

This device complies with the 47 CFR, Part 2 and Part 15 of FCC Requirements. Operation of this device is subject to the following two conditions :

- (1) this device may not cause harmful interference
- (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of

the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy, and if not installed to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct

the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Plug the computer into a different outlet so that the two devices are on different branch circuits.
- If necessary, the user should consult the dealer or an experienced radio / television technician for additional suggestions.

Warning

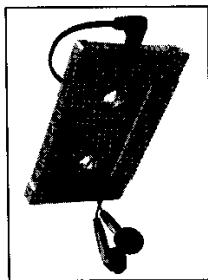

- Shielded interface cables must be used in order to comply with emission limits.
- Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

I. Introduction

Welcome to the world of Rome! The Rome plays your favorite audio soundtrack formatted with the popular MP3 standard. Rome series are coming after the Rome(up301)

The basic concepts of Rome

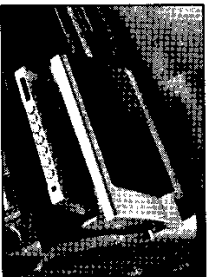

● Play by itself!

● Use in your car!

● Use in your audio deck!

On top of the above functions, Rome II (up-322) is improved its convenience as using a remote control with earphones and USB PC interface for easier and faster upload and download. Also, it has a MMC memory slot to extend its memory size by users.

- Basic System Requirements
- Package Contents

1. Basic system Requirements
