To Whom It May Concern:

RE: Application for FCC Grant of Equipment Authorization
FCC ID: PCVCTM5206015A

Merrychef wish to apply for the FCC Grant of Equipment Authorization for a variant of the Mealstream EC501 Commercial Microwave Oven.

The product is a variation of the product Certified under the FCC Identifier PCVCTM3206015A. The difference between the products is that the conventional heater element has been de-rated from 3000 Watts to 2500 Watts, the Microwave power remains the same at 1425 Watts on both variants.

Due to the "resistive" nature of the heater element and its power being less than that of the previously certified products, Merrychef believes that the change to the element power rating should not impair the EMC performance documented in the Test Report for PCVCTM3206015A.

Therefore Merrychef will re-submit the test report for the certified model PCVCTM3206015A on the basis that the results can be read across to the PCVCTM5206015A.

We trust this meets with your approval.

Yours sincerely

P. Harrison
