Federal Communications Commission
7435 Oakland Mills Road
Columbia, Maryland 20146

Gentlemen:

The attached documentation is provided in support of a formal submission to your organization for a Class II Permissive Change approval of an intentional unlicensed transmitter. On behalf of our client, Aegis Labs has included an application for a Grant of Equipment Authorization pursuant to Subpart C of part 15 of FCC Rules (47 CFR) regarding intentional radiators. The data within the test report demonstrates the equipment was tested in a manner described under Part 2 and 15 of the Code of Federal Regulations.

This Class II Permissive Change is for Portable approval to add a WWAN device (FCC ID: N7NMC8765 / N7NMC5720, MN: MC8765 / MC5720) to the already approved Lenovo X60 Tablet Series (MN: 6363/ 6364/ 6365/ 6366/ 6367/ 6368) with an Intel PRO/Wireless 3945ABG Network Connection (FCC ID: PD9LEN3945ABG, MN: WM3945ABG) installed in its Mini PCIe slot to the approved. The Intel PRO/Wireless 3945ABG Network Connection is a dual band WLAN adapter (802.11a, 802.11b and 802.11g). The notebook computer was tested with a set of Wistron NeWeb Corporation antennas continuously transmitting and receiving from the MAIN and AUX antenna ports.

If there are any additional questions or if further information is needed, please contact us at your earliest convenience.

Sincerely,

A handwritten signature in blue ink, appearing to read "J. Candelas", written on a white rectangular background.
