Fax number: (916) 356 - 8511

Date: 10/3/2006

Regarding: Antenna mounting distances

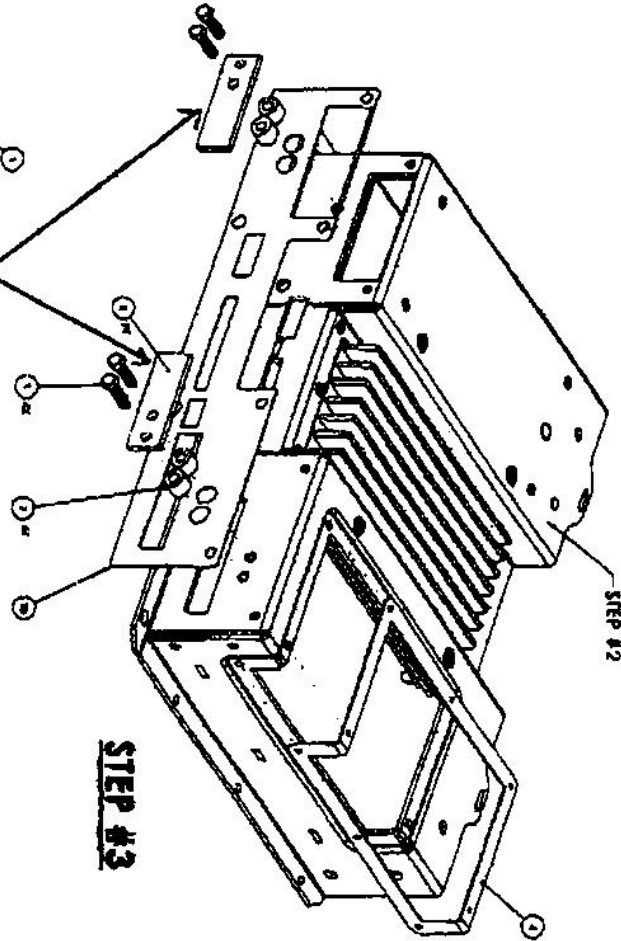

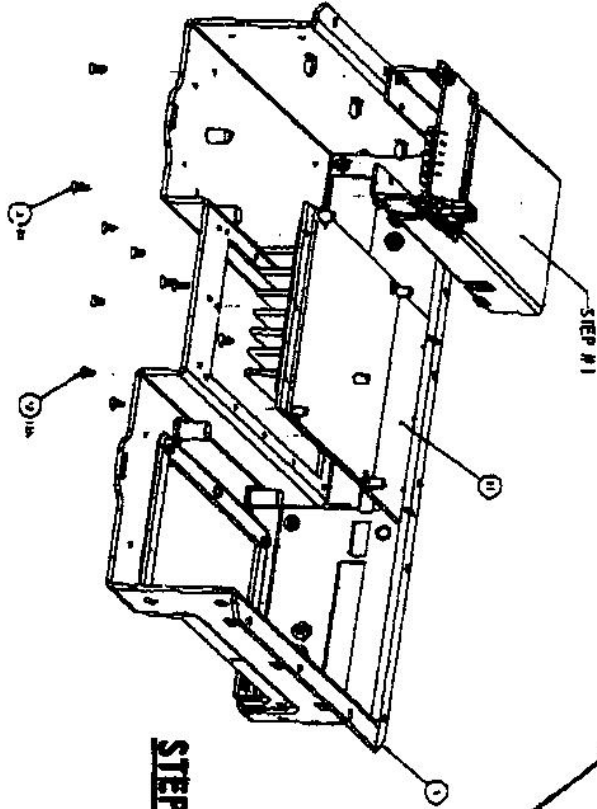

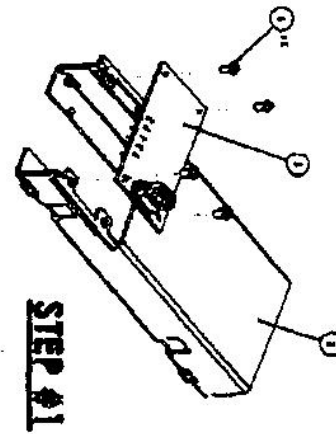

Comments:

Uday,

This computer is a ruggedized vehicle mounted PC used in the warehouse and distribution markets. Most often the computer is mounted on a forklift and occasionally on a cart. As you can see in the attached photos we are always more than 12 inches from the user and typically 18 inches, or up to 30 inches (arms reach).

Please let me know if you need anything else.

Dan
